Analysis and Visualization of Citation Networks Dangzhi Zhao, Andreas Strotmann, 2022-06-01 Citation analysis the exploration of reference patterns in the scholarly and scientific literature has long been applied in a number of social sciences to study research impact knowledge flows and knowledge networks It has important information science applications as well particularly in knowledge representation and in information retrieval Recent years have seen a burgeoning interest in citation analysis to help address research management or information service issues such as university rankings research evaluation or knowledge domain visualization This renewed and growing interest stems from significant improvements in the availability and accessibility of digital bibliographic data both citation and full text and of relevant computer technologies The former provides large amounts of data and the latter the necessary tools for researchers to conduct new types of large scale citation analysis even without special access to special data collections Exciting new developments are emerging this way in many aspects of citation analysis This book critically examines both theory and practical techniques of citation network analysis and visualization one of the two main types of citation analysis the other being evaluative citation analysis To set the context for its main theme the book begins with a discussion of the foundations of citation analysis in general including an overview of what can and what cannot be done with citation analysis Chapter 1 An in depth examination of the generally accepted steps and procedures for citation network analysis follows including the concepts and techniques that are associated with each step Chapter 2 Individual issues that are particularly important in citation network analysis are then scrutinized namely field delineation and data sources for citation analysis Chapter 3 disambiguation of names and references Chapter 4 and visualization of citation networks Chapter 5 Sufficient technical detail is provided in each chapter so the book can serve as a practical how to guide to conducting citation network analysis and visualization studies While the discussion of most of the topics in this book applies to all types of citation analysis the structure of the text and the details of procedures examples and tools covered here are geared to citation network analysis rather than evaluative citation analysis This conscious choice was based on the authors observation that compared to

evaluative citation analysis citation network analysis has not been covered nearly as well by dedicated books despite the fact that it has not been subject to nearly as much severe criticism and has been substantially enriched in recent years with new theory and techniques from research areas such as network science social network analysis or information visualization

How Economics Professors Can Stop Failing Us Steven Payson, 2017-08-18 This book provides an eye opening expos on economics professors that will surely shock anyone who is not familiar with the topic and even some of those who are familiar with it It is critical of the behavior of economics professors but is not critical of the field of economics itself In fact the book argues that it is essential for economics professors to improve in the work they perform precisely because of the vital importance of their field Other books that criticize economics professors typically present complex arguments that interest only the most advanced scholars However this book is completely different It is written to be understandable to anyone who has with an interest in economics regardless of their background At the same time the book does include the most relevant scholarly arguments it just presents them in a manner that allows anyone to understand them Also unlike other books on economics How Economics Professors Can Stop Failing Us is written in the context of a genuine expos As such it ventures backstage behind the show business that has dominated the profession revealing the profession's deep dark and at times rather ugly secrets The book is able to do this by having an author who has experienced first hand studied and written on this topic area for over three decades who has organized training seminars on it and who has served for over a decade as the Executive Director of the Association for Integrity and Responsible Leadership in Economics While exposing the profession's shameful problems the book also offers great hope in providing realistic solutions to them One of the main solutions it proposes is for economics professors who are now failing us to follow and learn from those other professors who are not failing us who have instead admirably upheld the principles of professional ethics and scientific integrity In this sense How Economics Professors Can Stop Failing Us offers the most hope and perhaps the only hope for economics professors to improve and to play the responsible role that their students their employers and society overall expects of them
