late in the process Ford had spent millions in vetting and audits which then set in motion a vengeful response against Ferrari. The result was the unthinkable: Ford beat Ferrari at Le Mans. Ford wanted to become competitive quickly but it did not have the race history or resources in-house. To remedy the situation, Ford searched the U.K. for an independent company to help accelerate its race car development. It first settled on Lola Cars and set up Ford Advanced Vehicles. Later, Ford brought its Le Mans effort to the U.S. and the Kar Kraft relationship was established. Although Kar Kraft was technically an independent company, it really only had one customer: Ford Special Vehicles. Kar Kraft's story doesn't begin and end with the GT 40 that took the win away from Ferrari at Le Mans. Ford expanded upon the program and organized an all-out assault on racing in general. Cars were prepared for Trans-Am, NASCAR, NHRA, and Can-Am competition. Street versions of the Boss 429 were assembled under its roof. And famed prototypes including the L1D Mustang Boss 302, Maverick, and Mach 2C were all assembled in Ford's contracted race shop. And then, out of the blue, its doors closed for good on a cold day in 1970. History tells us that Ford won Le Mans, the Daytona 500, and the Trans-Am championship. But it doesn't tell us how this was accomplished. Author Charlie Henry, a former Kar Kraft employee, has enlisted the help of many of his former co-workers to bring you the very first book ever published on Ford's all-encompassing special projects facility: Kar Kraft.

Wheels Arthur Hailey, 2014-05-13. Master storyteller Arthur Hailey's #1 New York Times bestseller is a turbocharged thriller about America's automobile industry from the bottom up: Ford, Chrysler, General Motors. They were the Big Three, accused by critics of greed, monopoly, and abusing the public trust. In the shadows of these towering giants is American Motors, blazing its own path to greatness. Adam Trenton, the fiercely ambitious executive in charge of project development, wants to take the company into the future with the new cutting-edge car he's developing, but his single-minded dedication has his neglected wife seeking dangerous thrills, making Adam vulnerable to a growing web of deceit, blackmail, and organized crime. From Detroit's inner city to its affluent suburbs, from the executive suites and secret design studios to the assembly line, jungle, and the maximum security testing grounds, *Wheels* is a breakneck ride full of human drama through one of America's most complex and competitive industries.

Misconi most significant publications was his 1979 Nature paper on streaming of interstellar grains into the solar system. The paper predicted that interstellar dust should stream into the solar system from the direction the then detectable interstellar gas and it also described the interaction of the extrasolar particles with the solar wind and the IP Interplanetary magnetic field. The paper was timely and highly prophetic as the stream of interstellar dust was detected just a few years later by instruments on the Ulysses and Galileo spacecraft. Dr Seung Soo Hong, former chair of the Astronomy Department at Seoul National University in Seoul, South Korea, said this about the author: "I still remember in one of those brain storming sessions he suggested to fire a big gun from a satellite to a nearby asteroid and to observe the scattered light of the Sun and man-made source by the dust excavated from the asteroid surface. The Space Astronomy Laboratory team couldn't materialize the idea then. But to think back this was a brilliant idea with which one can characterize the nature of ligorith particles for a reasonable price."
