Media and Society After Technological Disruption Kyle Langvardt,Justin (Gus) Hurwitz,2024-05-23 The internet has reshaped the media landscape and the social institutions built upon it Competition from online media sources has decimated local

journalism and diminished the twentieth century's established journalistic gatekeepers. Social media puts individual users front and center in the creation of the content that they consume. Harmful speech can spread further and faster and the institutions responsible for policing that speech. Facebook, TikTok, YouTube and the like lack any clear twentieth century analog. The law is still working to catch up to the world these changes have wrought. This volume gathers sixteen scholars in law, media, technology and history to consider these changes. Chapters explore the breakdown of trust in the media, changes in the law of defamation and privacy, challenges of online content moderation and financial viability for journalistic enterprises in the internet age. This title is also available as Open Access on Cambridge Core.

Human Rights Responsibilities in the Digital Age Jonathan Andrew, Frédéric Bernard, 2021-08-26. This book examines the tangled responsibilities of states, companies and individuals surrounding human rights in the digital age. Digital technologies have a huge impact for better and worse on human lives while they can clearly enhance some human rights they also facilitate a wide range of violations. States are expected to implement efficient measures against powerful private companies but at the same time they are drawn to technologies that extend their own control over citizens. Tech companies are increasingly asked to prevent violations committed online by their users yet many of their business models depend on the accumulation and exploitation of users' personal data. While civil society has a crucial part to play in upholding human rights it is also the case that individuals harm other individuals online. All three stakeholders need to ensure that technology does not provoke the disintegration of human rights. Bringing together experts from a range of disciplines including law, international relations and journalism this book provides a detailed analysis of the impact of digital technologies on human rights which will be of interest to academics, research students and professionals concerned by this issue.
