The Blacker the Ink Frances Gateward, John Jennings, 2015-07-16 When many think of comic books the first thing that comes to mind are caped crusaders and spandex wearing super heroes Perhaps inevitably these images are of white men and more rarely women It was not until the 1970s that African American superheroes such as Luke Cage Blade and others emerged But as this exciting new collection reveals these superhero comics are only one small component in a wealth of representations of black characters within comic strips comic books and graphic novels over the past century The Blacker the Ink is the first book to explore not only the diverse range of black characters in comics but also the multitude of ways that black artists writers and publishers have made a mark on the industry Organized thematically into panels in tribute to sequential art published in the funny pages of newspapers the fifteen original essays take us on a journey that reaches from the African American newspaper comics of the 1930s to the Francophone graphic novels of the 2000s Even as it demonstrates the wide spectrum of images of African Americans in comics and sequential art the collection also identifies common character types and themes running through everything from the strip The Boondocks to the graphic novel Nat Turner Though it does not shy away from examining the legacy of racial stereotypes in comics and racial biases in the industry The Blacker the Ink also offers inspiring stories of trailblazing African American artists and writers Whether you are a diehard comic book fan or a casual reader of the funny pages these essays will give you a new appreciation for how black characters and creators have brought a vibrant splash of color to the world of comics

Morgan, 2018-01-02 Images can be studied in many ways as symbols displays of artistic genius adjuncts to texts or naturally occurring phenomena like reflections and dreams Each of these approaches is justified by the nature of the image in question as well as the way viewers engage with it But images are often something more when they perform in ways that exhibit a capacity to act independent of human will Images come alive they move us to action calm us reveal the power of the divine change the world around us In these instances we need an alternative model for exploring what is at work one that recognizes the presence of images as objects that act on us Building on his previous innovative work in visual and religious studies David Morgan creates a new framework for understanding how the human mind can be enchanted by images in *Images at Work* In carefully crafted arguments Morgan proposes that images are special kinds of objects fashioned and recognized by human beings for their capacity to engage us From there he demonstrates that enchantment as described is not a violation of cosmic order but a very natural way that the mind animates the world around it His groundbreaking study outlines the deeply embodied process by which humans create culture by endowing places things and images with power and agency These various agents human and non human material geographic and spiritual become nodes in the web of relationships thus giving meaning to images and to human life Marrying network theory with cutting edge work in visual studies and connecting the visual and bodily technologies employed by the ancient Greeks and Romans to secular icons like
