2004-2005 Guide to Educational Credit by Examination Jo Ann Robinson, Troy Polite, Nancy Musick, 2004 **2001 Guide to Educational Credit by Examination** Jo Ann Robinson, Jacqueline E. Taylor, 2001 *International Law and Weapons Review* Natalia Jevglevskaja, 2021-12-16 International law requires that before any new weapon is developed purchased or modified the legality of its use must be determined This book offers the first comprehensive and systemic analysis of the law mandating such assessments Article 36 of the 1977 Additional Protocol I to the Geneva Conventions Underpinned by empirical research the book explores the challenges the weapons review authorities are facing when examining emerging military technology such as autonomous weapons systems and autonomous cyber capabilities It argues that Article 36 is sufficiently broad to cover a wide range of military systems and offers States the necessary flexibility to adopt a process that best suits their organisational demands While sending a clear signal that law should not simply follow technological developments but rather steer them the provision has its limits however which are shaped and defined by the interpretative decisions made by States **A Guide to AHP Credentialing** Beverly E. Pybus, Carol S. Cairns, 2004 **The Oxford Guide to International Humanitarian Law** Ben Saul, Dapo Akande, 2020-05-07 International humanitarian law is the law that governs the conduct of participants during armed conflict This branch of law aims to regulate the means and methods of warfare as well as to provide protections to those who do not or who no longer take part in the hostilities It is one of the oldest branches of international law and one of enduring relevance today The Oxford Guide to International Humanitarian Law provides a practical yet sophisticated overview of this important area of law Written by a stellar line up of contributors drawn from those who not only have extensive practical experience but who are also regarded as leading scholars of the subject the text offers a comprehensive and authoritative exposition of the field The Guide provides professionals and advanced students with information and analysis of sufficient depth to enable them to perform their tasks with understanding and confidence Each chapter illuminates how the law applies in practice but does not shy away from the important conceptual issues that underpin how the law has developed It will serve as a first port of call and a regular reference work for those interested in international humanitarian law **A Guide to International Disarmament Law** Stuart Casey-Maslen, Tobias Vestner, 2019-05-24 Disarmament is integral to the safeguarding and promotion of security development and human rights Hundreds of millions of dollars are spent each year on disarmament operations yet no comprehensive guide exists to explain clearly the international rules governing disarmament This book seeks to fill that gap It describes the international legal rules that govern disarmament and the operational political and technical considerations that govern their implementation This book aims to support compliance implementation and further development of international disarmament law Traditionally disarmament focused on weapons of mass destruction This remains a critically important area of work In recent decades the scope of disarmament has broadened to encompass also conventional weapons
