

TEST 4, WRITING TASK 1

This is an answer written by a candidate who achieved a **Band 6.0** score.

The chart demonstrates what Anthropology graduates from one university did after finishing their undergraduate degree course. The table indicates the salaries of the anthropologists in work after 5 years.

As we can see from the pie chart, majority of Anthropology graduates are employed. Fifty-two per cent of them have a full-time job. Almost twenty per cent of graduates have either a part-time work or it is combined with post grad study. Eight per cent of students continue their full-time education. Only twelve per cent of graduates are unemployed. The information about all the rest graduates is unknown.

Thus, most of Anthropology graduates have a job. Half of those who work in Government sector earn more than a hundred thousand dollars. It is less than proportion of freelance consultants who get the same amount of money. Besides, it is only one-third of those who work for private companies. We can see nearly the same percentage of those who get from fifty thousand dollars to ninety-nine thousand dollars as freelance consultants and in government sector. The situation is different in private companies. More of them get from fifty thousand to seventy-four thousand dollars than from seventy-five to ninety-nine thousand dollars. The proportion of those who work for private companies for from twenty-five thousand to forty-nine thousand dollars is half bigger than the same one in government sector and as freelancers.

So, the chart and the table show us that most of Anthropology graduates are employed and a salary more than twenty-five thousand dollars after five year's work.
