significant area of growth in the export of medical health and tourism services Although spas and improved well being have long been part of the tourist experience health tourism now includes travel for medical purposes ranging from cosmetic and dental surgery through to transplants and infertility treatment Many countries including China Cuba Hungary India Thailand Malaysia and Singapore actively promote and compete for the medical tourist dollar while many developed countries also provide niche private services However the field of medical tourism is increasingly being subject to scrutiny and debate particularly as a result of concerns over regulatory ethical and wider health issues Drawing on a range of theoretical and methodological perspectives this book is one of the first to critically address the substantial political philosophical and ethical issues that arise out of the transnational practices of medical tourism Through a series of chapters the book engages with key issues such as the role of regulatory and policy structures in influencing medical and health tourism related mobilities These issues are investigated by considering range of developing and developed countries medical systems and health economic perspectives The book adopts a multi layered perspective to not only investigate the business and marketing practices of medical and health tourism but places these within a broader framework of contemporary globalisation policy and practice By doing so it opens up debate of the ethical space in which medical and health tourism operates as well as reinforce the wide ranging perspectives that exist on the subject in both the public and academic imagination This significant contribution will be of interest to students academics in tourism and medical policy trade and economic development fields *Medical Tourism* C. Internet Corporation for Assigned Names and Numbers ICANN founded in 1998 is a not for profit public benefit corporation established to ensure a stable and secure global Internet As the custodian of the Domain Name System DNS one of its key responsibilities is the introduction and promotion of competition in Internet related markets an aim which ICANN has tried to achieve through the delegation of generic top level domains gTLDs This book investigates how successful ICANN has been in achieving this goal Over the years ICANN has been required to decide on a substantial number of complaints from applicants for gTLDs related to capture arbitrariness discrimination and unwarranted restriction of competition This book is the first detailed study of complaints related to ICANN decisions that have been brought using ICANN s Independent Review Process IRP The authors preeminent expert practitioners in international litigation and arbitration related to Internet governance take a close look at how ICANN has handled the major issues raised and how ICANN has shaped its own accountability mechanisms The book also weighs the influence of external accountability on ICANN s decision making process and considers the implications of third party decisions such as IRP decisions for the ongoing development of the Internet This authoritative analysis covers the regulatory framework governing ICANN and the introduction of new gTLDs in a historic perspective ICANN s accountability framework all the IRP cases that have been decided to date with an in depth analysis of those cases that have become reference decisions in the latest application round and the 2016 amendments to ICANN s articles of incorporation and bylaws concentrating on the problems that remain unresolved This work is a welcome addition to the debate on how to address the shortcomings in ICANN s accountability in the interests of the global Internet community The authors make concrete proposals and recommendations suggesting changes to ICANN s regulatory framework in the light of the lessons learned and with a view to preventing similar problems arising in a next round of gTLD applications This book has the potential to become the Green Book for fundamental changes to ICANN s accountability framework *International Internet Law* Joanna Kulesza,2012-03-15 This book discusses the international legal issues underlying Internet Governance and proposes an international solution to its problems The book encompasses a wide spectrum of current debate surrounding the governance of the internet and focuses on the areas and issues which urgently require attention from the international community in order to sustain the proper functioning of the global network that forms the foundation of our information fuelled society Among the topics discussed are international copyright protection state responsibility for cyber attacks cyberterrorism and international on line privacy protection Taking a comparative approach by examining how different jurisdictions such as the United States the European Union China and Singapore have attempted various solutions to the problem of Internet Governance the author offers a practical solution to the problem and is a proponent of International Internet Law Kulesza suggests that just as in the case of International Environmental Law an Internet Framework Convention could shape the starting point for international cooperation and lead to a clear contractual division of state jurisdictional competences International Internet Law is of particular interest to legal scholars engaged with the current challenges in international law and international relations as well as students of law international relations and political science The issues discussed in the book are also relevant to journalists and other media professionals facing the challenges of analyzing current international developments in cyberspace
