United Nations Human Settlements Programme, 2012-05-23 *The Challenge of Slums* presents the first global assessment of slums emphasizing their problems and prospects. Using a newly formulated operational definition of slums, it presents estimates of the number of urban slum dwellers and examines the factors at all levels from local to global that underlie the formation of slums, as well as their social, spatial, and economic characteristics and dynamics. It goes on to evaluate the principal policy responses to the slum challenge of the last few decades. From this assessment, the immensity of the challenges that slums pose is clear. Almost 1 billion people live in slums, the majority in the developing world, where over 40 per cent of the urban population are slum dwellers. The number is growing and will continue to increase unless there is serious and concerted action by municipal authorities, governments, civil society, and the international community. This report points the way forward and identifies the most promising approaches to achieving the United Nations Millennium Declaration targets for improving the lives of slum dwellers by scaling up participatory slum upgrading and poverty reduction programmes. *The Global Report on Human Settlements* is the most authoritative and up-to-date assessment of conditions and trends in the world's cities. Written in clear language and supported by informative graphics, case studies, and extensive statistical data, it will be an essential tool and reference for researchers, academics, planners, public authorities, and civil society organizations around the world.

Leadership Elesa Zehndorfer, 2013-12-17 Leadership is crucial to the success of any organisation. But how can one seek to most effectively develop the leadership ability of both themselves and others? How should one define leadership? Are great leaders born or made? This text addresses such fundamental questions via a comprehensive and critical approach to the discussion of key leadership theories. The text encourages the reader to consider the role of both follower and leader in the leadership process and to recognise the emergence of both effective and destructive leadership. Each chapter features Expert Insights on leadership, written by leaders in their respective fields. These insights offer the reader a valuable real-world perspective of leadership that enriches the abstract theory covered in each chapter. The provision of case studies, examples, and supplementary online material provide the effective delivery of both undergraduate and postgraduate lectures and workshops, and self-guided study. A concluding chapter that focuses on the development of one's self-leadership ultimately facilitates a comprehensive introduction to what is at once a seductive, complex, transformative, and alluring topic.
