□ Frank K. Reilly, 2002 **Technical Analysis - Myth or Magic?** Christian Koessler, 2010-12-23 Inhaltsangabe Introduction

The following paper will outline the suitability of Technical Analysis TA regarding selective chosen tools for performance increase versus the classic Buy and Hold Strategy BHS These two approaches beside the Fundamental Analysis FA are the foundations used by investors concerning their Investment strategy and differ substantially in their nature Thereby this dissertation will investigate whether the application of active TA is a productive approach yielding to favourable results and having the ability to outperform the passive BHS To achieve substantive results the comparisons of performances will be stretched to 21 years and are based on the following three indices which differ significantly concerning their location volume and importance Standard 200 days and 100 days Moving Average Convergence Divergence Bollinger Bands Oscillators Relative Strength Index Slow Stochastic Momentum TA can be divided into Chartism and the statistical based TA Although a clear demarcation between these groups is not given in reality as most proponents of TA combine both techniques The vast majority of this dissertation will only reflect the latter This can also be justified as Chartists predict future price developments based on trend lines patterns and formations Murphy 1999 states that all Chartists are Technical Analysts but not all Technical Analysts are Chartists Due to the lack of standardised price characteristics Chartism implies a high degree of subjectivity Therefore the absence of operational ability of this sub area would not lead to a feasible analysis concerning an increase in performance We maintain that financial markets are either moving in boom or bust cycles Bull or Bear Markets The classic BHS based on the Investment Legend Benjamin Graham has generated high profits in the CFA Program Curriculum 2017 Level I, Volumes 1 - 6 CFA Institute, 2016-08-01 Clear concise instruction for all CFA Level I concepts and competencies for the 2017 exam The same official curricula that CFA Program candidates receive with program registration is now available publicly for purchase CFA Program Curriculum 2017 Level I Volumes 1 6 provides the complete Level I Curriculum for the 2017 exam delivering the Candidate Body of Knowledge CBOK with expert instruction on all ten topic areas of the CFA Program Fundamental concepts are explained with in depth discussion and a heavily visual style while cases and examples demonstrate how concepts apply in real world scenarios Coverage includes ethical and professional standards quantitative analysis economics financial reporting and analysis corporate finance equities fixed income derivatives alternative investments and portfolio management all organized into individual sessions with clearly defined Learning Outcome Statements Charts graphs figures diagrams and financial statements illustrate concepts to facilitate retention and practice questions provide the opportunity to gauge your understanding while reinforcing important concepts The Level I Curriculum covers a large amount of information this set breaks the CBOK down into discrete study sessions to help you stay organized and focused on learning not just memorizing important CFA concepts Learning Outcome Statement checklists guide readers to important concepts to derive from the readings Embedded case studies and examples throughout demonstrate practical application of concepts Figures diagrams and additional commentary make difficult concepts
