**26 Value Investing Case Studies (2011-2017)** Shailesh Kumar, 2017-09-11 26 Real World Value Investing Case Studies from Thesis to Outcome. Value investing theory is everywhere. But how do the real practicing value investors go about analyzing and picking stocks for their portfolios? Is it better for an aspiring value investor to learn the theory of value investing? Or should they review the practical examples in the form of case studies? Value investing in practice is different than value investing in theory. In theory, there are formulas and calculations and models. You can view each stock through these lenses and it either passes or fails. In practice, lines are not as sharply defined. Value investors often make calls based on imprecise information. Most of these situations are atypical and therefore making reliable future estimates is an exercise in futility. And of course, the future is never what you imagine it to be. Stock market success depends on knowing the science, theory, but also the art of value investing. The art comes from experience, mainly your own, but also the experience of other value investors who are practicing in the field. This is where these case studies can be very helpful. At Value Stock Guide, we have created a vast body of work in value investing with our past investments. This volume covers the investments we made and exited between 2011 and 2017. Each investment is a case study in itself and highlights the value investment process from due diligence to purchase and eventual profit realization. Whether you are a student of investment analysis or perhaps a value investor yourself, you will find many little nuggets of wisdom in these case studies. You will see many different situations and scenarios play out and how we at VSG responded to

these scenarios And you will also see the outcome of each of the investments You will learn to analyze stocks properly create processes to keep you disciplined and you will also learn to keep your calm when an investment does not go your way and figure out a way of avoiding a loss You will also learn the importance of not losing money Much of the material is in the form of the communication we sent to our clients when each of these stocks was recommended Therefore the tone is conversational not pedantic at all and the material is not overly technical One of the things I truly believe in is if you are not able to explain the reasons why you are buying a stock to a 5 year old you perhaps do not understand the stock well enough

*Inside the Investments of Warren Buffett* Yefei Lu, 2016-08-09 Since the 1950s Warren Buffett and his partners have backed some of the twentieth century's most profitable trendsetting companies. But how did they know they were making the right investments? What did Buffett and his partners look for in an up and coming company and how can others replicate their approach? A gift to Buffett followers who have long sought a pattern to the investor's success *Inside the Investments of Warren Buffett* presents the most detailed analysis to date of Buffett's long term investment portfolio. Yefei Lu, an experienced investor, starts with Buffett's interest in the Sanborn Map Company in 1958 and tracks nineteen more of his major investments in companies like See's Candies, the Washington Post, GEICO, Coca Cola, US Air, Wells Fargo and IBM. Accessing partnership letters, company documents, annual reports, third party references and other original sources, Lu pinpoints what is unique about Buffett's timing, instinct, use of outside knowledge and postinvestment actions, and he identifies what could work well for all investors in companies big and small, domestic and global. His substantial chronology accounts for broader world events and fluctuations in the U.S. stock market, suggesting Buffett's most important trait may be the breadth of his expertise.
