Investment Banking Valuation :

Investment Banking Joshua Pearl, Joshua Rosenbaum, 2013-05-28 Investment Banking UNIVERSITY EDITION is a highly accessible and authoritative book written by investment bankers that explains how to perform the valuation work at the core of the financial world. This body of work builds on Rosenbaum and Pearl's combined 30 years of experience on a multitude of transactions as well as input received from numerous investment bankers, investment professionals at private equity firms and hedge funds, attorneys, corporate executives, peer authors, and university professors. This book fills a noticeable gap in contemporary finance literature which tends to focus on theory rather than practical application. It focuses on the primary valuation methodologies currently used on Wall Street: comparable companies, precedent transactions, DCF, and LBO analysis, as well as M/A analysis. The ability to perform these methodologies is especially critical for those students aspiring to gain full-time positions at investment banks, private equity firms, or hedge funds. This is the book Rosenbaum and Pearl wish had existed when we were trying to break into Wall Street. Written to reflect today's dynamic market conditions, Investment Banking UNIVERSITY EDITION skillfully introduces students to the primary valuation methodologies currently used on Wall Street. Uses a step-by-step how-to approach for each methodology and builds a chronological knowledge base. Defines key terms, financial concepts, and processes throughout. Provides a comprehensive overview of the fundamentals of LBOs and an organized M/A sale process. Presents new coverage of M/A buy-side analytical tools which includes both qualitative aspects such as buyer motivations and strategies along with technical financial and valuation assessment tools. Includes a comprehensive merger consequences analysis including accretion, dilution, and balance sheet effects. Contains challenging end-of-chapter questions to reinforce concepts covered. A perfect guide for those seeking to learn the fundamentals of valuation, M/A, and corporate finance used in investment banking and professional investing. This UNIVERSITY EDITION, which includes an instructor's companion site, is an essential asset. It provides students with an invaluable education as well as a much-needed edge for gaining entry to the ultra-competitive world of professional finance.

Investment Banking Joshua Rosenbaum, Joshua Pearl, 2009 Mark Twain long known for his critical views of formal education once wisely noted I never let my schooling interfere with my education Twain s one liner strikes at the core of investment banking where deals must be lived before proper knowledge and understanding can be obtained Hard time must be spent doing deals with complexities in valuation terms and negotiations unique to every situation The truly great firms and dealmakers have become so by developing cultures of apprenticeship that transfer knowledge and creativity from one generation to the next The task of teaching aspiring investment bankers and finance professionals has been further complicated by the all consuming nature of the trade as well as its constantly evolving art and science Therefore for me personally it s exciting to see Joshua Rosenbaum and Joshua Pearl take the lead in training a new generation of investment bankers Their work in documenting valuation and deal process in an accessible manner is a particularly important contribution as many aspects of investment banking cannot be taught even in the world s greatest universities and business schools Rosenbaum and Pearl provide aspiring and even the most seasoned investment bankers with a unique real world education inside Wall Street s less formal classroom where deals come together at real time speed The school of hard knocks and of learning by doing which was Twain s classroom demands strong discipline and sound acumen in the core fundamentals of valuation It requires applying these techniques to improve the quality of deals for all parties so that dealmakers can avoid critical and costly mistakes as well as unnecessary risks My own 35 plus years of Wall Street education has clearly demonstrated that valuation is at the core of investment banking Any banker worth his salt must possess the ability to properly value a business in a structured and defensible manner This logic and rationale must inspire clients and counterparties alike while spurring strategic momentum and comprehension into the art of doing the deal Rosenbaum and

Pearl succeed in providing a systematic approach to addressing a critical issue in any M A IPO or investment situation namely how much is a business or transaction worth They also put forth the framework for helping approach more nuanced questions such as how much to pay for the business and how to get the deal done Due to the lack of a comprehensive written reference material on valuation the fundamentals and subtlety of the trade are often passed on orally from banker to banker on a case by case basis In codifying the art and science of investment banking the authors convert this oral history into an accessible framework by bridging the theoretical to the practical with user friendly step by step approaches to performing primary valuation methodologies Many seasoned investment bankers commonly lament the absence of relevant and practical how to materials for newcomers to the field The reality is that most xv P1 ABC ABC P2 c d QC e f T1 g FM JWBT063 Rosenbaum March 18 2009 15 37 Printer Name Hamilton xvi FOREWORD financial texts on valuation and M A are written by academics The few books written by practitioners tend to focus on dramatic war stories and hijinks rather than the nuts and bolts of the techniques used to get deals done Rosenbaum and Pearl fill this heretofore void for practicing and aspiring investment bankers and finance professionals Their book is designed to prove sufficiently accessible to a wide audience including those with a limited finance background It is true that we live in uncertain and volatile times times that have destroyed or consumed more than a few of the most legendary Wall Street institutions However one thing will remain a constant in the long term the need for skilled finance professionals with strong technical expertise Companies will always seek counsel from experienced and independent professionals to analyze structure negotiate and close deals as they navigate the market and take advantage of value creating opportunities Rosenbaum and Pearl promulgate a return to the fundamentals of due diligence and the use of well founded realistic assumptions governing growth profitability and approach to risk Their work toward instilling the proper skill set and mindset in aspiring generations of Wall Street professionals will help establish a firm foundation for driving a brighter economic future Investment Banking Michael Herlache,2017-01-28 There are many investment banking texts out there that claim that financial modeling and valuation is the core work of the investment banker This is simply not the truth The core work of the investment banker is origination mandate target matching and deal structuring It should follow that a text course on investment banking should be based upon the same It is the good fortune that the reader has encountered such a book course Investment Banking M A Origination Execution Financial Modeling Valuation explains origination mandate target matching and deal structuring i e how investment bankers actually make their money For those new to investment banking you are first going to want to clarify whether you would like to work on the sell side for a few years or pursue a career in investment banking The skills that you will need to get started in investment banking are different than those that you will need to have a long and successful career in investment banking The role in investment banking transforms from one that is research financial modeling valuation based into one focused on origination and facilitating the M A process M A Mergers Acquisitions is the core product of investment banking and the

other products advisory capital raising simply support this We founded Investment Banking University www.InvestmentBankingU.com to prepare students for both bulge bracket and middle market investment banking career opportunities We see a paradigm shift occurring in the field of investment banking The idea that you need to spend three years of your life as an analyst doing 80 hour workweeks building financial models to become an investment banker is a faulty paradigm The real value add of an investment banker is not financial modeling valuation but rather origination mandate target matching and deal structuring You don't need Goldman Sachs permission to be an investment banker just like you don't need McKinsey's permission to be a consultant Investment banking for private companies in the middle market is a great way to build your initial coverage and career as an investment banker without sacrificing a family life or your health
