Elements of Social and Political Philosophy Jan J.T. Szrednicki, 2012-12-06 The general purpose of this book differs from those of most of the works found traditionally in the field of political philosophy Firstly the present approach is in no way prescriptive or normative as the interest centres on explication rather than an evaluative assessment of this that or another type of arrangement or act 1 It will be clear that I am in complete disagreement with Gewirth when he claims that The central concern of political philosophy is the moral evaluation of political power It seems obvious that the understanding of political and social forms of life and a fortiori of political power must come before its evaluation This cannot be provided by moral assessment alone Thus an analytical or explicative approach which promotes such understanding must come first and must be the central concern of the appropriate philosophical discipline This is not to say that moral assessment is illegitimate nor even that it cannot be one of the concerns of political philosophy but it is to deny that it can be central even though it might be somebody's central interest To the extent to which this book is successful it will provide an argument in my favour if the job can be done obviously it is of primary importance But we should not assume that it cannot be done unless we can show that there is no separate sphere of political and or social phenomena Advances in Computer Science, Engineering and Applications David C. Wyld, Jan Zizka, Dhinakaran Nagamalai, 2012-05-17 The International conference series on Computer Science Engineering Applications ICCSEA aims to bring together researchers and practitioners from academia and

industry to focus on understanding computer science engineering and applications and to establish new collaborations in these areas The Second International Conference on Computer Science Engineering Applications ICCSEA 2012 held in Delhi India during May 25 27 2012 attracted many local and international delegates presenting a balanced mixture of intellect and research both from the East and from the West Upon a strenuous peer review process the best submissions were selected leading to an exciting rich and a high quality technical conference program which featured high impact presentations in the latest developments of various areas of computer science engineering and applications research
