Providing Integrity, Awareness, and Consciousness in Distributed Dynamic Systems Peter Simon Sapaty,2024-04-15 The ideas of this book originate from the mobile WAVE approach which allowed us more than a half century ago to implement citywide heterogeneous computer networks and solve distributed problems on them well before the internet The invented paradigm evolved into Spatial Grasp Technology and resulted in a European patent and eight books The volumes covered concrete applications in graph and network theory defense and social systems crisis management simulation of global viruses gestalt theory collective robotics space research and related concepts The obtained solutions often exhibited high system qualities like global integrity distributed awareness and even consciousness This current book takes these important characteristics as primary research objectives together with the theory of patterns covering them all This book is oriented towards system scientists application programmers industry managers defense and security commanders and university students especially those interested in advanced MSc and PhD projects on distributed system management as well as philosophers psychologists and United Nations personnel Spatial Networking in the United Physical, Virtual, and Mental World Peter S. Sapaty,2024-06-29 The current book chooses graphs and networks as primary and global research objectives after reviewing different types and areas of networking and existing works on graph and network operations The ideas of this book originate from the WAVE approach which allowed us more than half a century ago to implement citywide heterogeneous computer networks and solve distributed problems on them in flexible and mobile way The invented management paradigm evolved into Spatial Grasp Technology resulted in European patent and nine previous books oriented on concrete applications in social and defense systems security crises management collective robotics space research and others Many obtained results were dealing with graph and network structures and problems which were extremely important

in the researched areas It aims at development of higher level social infrastructures effectively integrating different types of networking under the same universal approach also application of networking in new areas like organoids and brain research This book is oriented toward system scientists application programmers industry managers university students philosophers psychologists and United Nations personnel too Self-Healing and Self-Recovering Systems under the Spatial Grasp Model Peter Simon Sapaty,2025-07-03 Perfect for system scientists application programmers industry managers defence and security commanders emergency agencies university students philosophers and psychologists too **Spatial Grasp as a Model for Space-based Control and Management Systems** Peter Simon Sapaty,2022-06-23 Governmental agencies and private companies of different countries are actively moving into space around Earth with the aim to provide smart communication and industry security and defense solutions This often involves massive launches of small cheap satellites in low earth orbits which is also contributing to the growth of space debris The book offers a high level holistic system philosophy model and technology that can effectively organize distributed space based systems starting with their planning creation and growth The Spatial Grasp Technology described in the book based on parallel navigation and pattern matching of distributed environments with high level recursive mobile code can effectively provide any networking protocols and important system applications by integrating and tasking available terrestrial and celestial equipment This book contains practical examples of technology based solutions for tracing hypersonic gliders continuing observation of certain objects and infrastructures on Earth from space space based command and control of large distributed systems as well as collective removal of increasing amounts of space junk Earlier versions of this technology were prototyped and used in different countries with the current version capable of being quickly implemented in traditional industrial or even university environments This book is oriented toward system scientists application programmers industry managers and university students interested in advanced MSc and PhD projects related to space conquest and distributed system management Dr Peter Simon Sapaty Chief Research Scientist Ukrainian Academy of Sciences has worked with networked systems for five decades Outside of Ukraine he has worked in the former Czechoslovakia now Czech Republic and Slovakia Germany the UK Canada and Japan as a group leader Alexander von Humboldt researcher and invited and visiting professor He launched and chaired the Special Interest Group SIG on Mobile Cooperative Technologies in Distributed Interactive Simulation project in the United States and invented a distributed control technology that resulted in a European patent and books with Wiley Springer and Emerald He has published more than 250 papers on distributed systems and has been included in the Marquis Who's Who in the World and Cambridge Outstanding Intellectuals of the 21st Century Peter also works with several international scientific journals Property and Human Rights in a Global Context Ting Xu,Jean Allain,2016-03-24 Property as a human rights concern is manifested through its incorporation in international instruments and as a subject of the law through property related cases considered by international human rights organs Yet for the most part the relationship

between property and human rights has been discussed in rather superficial terms lacking a clear substantive connection or common language That said the currents of globalisation have witnessed a new era of interrelation between these two areas of the law including the emergence of international intellectual property law and the recognition of indigenous claims which in fundamental ways speak to an engagement with human rights law This collection starts the conversation between human rights lawyers and property lawyers and explores analytical approaches to the increasing relationship between property and human rights in a global context The chapters engage with key theoretical and policy debates and range across three main themes The re evaluation of the public private divide in the law the tensions between the market and social justice in development and the balance between the rights of individuals and those of communities The chapters adopt a global comparative perspective and engage in case studies from countries including India Philippines Brazil the United States the United Kingdom and includes various regions of Africa and Europe
