Science Teaching in Schools Great Britain: Parliament: House of Lords: Science and Technology Committee, 2006-11-05 The Committee s report examines science and mathematics teaching in secondary schools in England focusing on the following issues the take up of science and mathematics at GCSE and A level the provision of careers advice to students problems in the recruitment and retention of teachers the quality of teaching methods and the role of continuing professional development The Committee finds that effective science teaching in schools is essential both in order to ensure a satisfactory general level of scientific literacy in society and to enable the next generation of scientists and engineers to progress into higher education and beyond It argues that the current examination system forces students to study an excessively narrow range of subjects at too early an age and it recommends that the Government should reconsider the Tomlinson proposals for a broader diploma based system for 14 19 year old students based on the International Baccalaureate This would ensure that students receive a more rounded education and are not made to over specialise before they are able to see the merits of studying science and mathematics Concerns are also raised about the shortage of science teachers particularly specialist physics and chemistry teachers the quality of careers advice in schools and the importance of practical science in schools

questions the Center for Public Integrity commissioned seven seasoned journalists to travel to New Orleans and investigate the storm's aftermath. In *City Adrift: New Orleans Before and After Katrina*, they present their findings. The stellar roster of contributors includes Pulitzer Prize winner John McQuaid whose earlier work predicted the failure of the levees and the impending disaster; longtime Boston Globe newsman Curtis Wilkie, a French Quarter resident for nearly fifteen years; and Katy Reckdahl, an award-winning freelance journalist who gave birth to her son in a New Orleans hospital the day before Katrina hit. They and the rest of the investigative team interviewed homeowners and health officials, first responders and politicians, and evacuees and other ordinary citizens to explore the storm from numerous angles, including health care, social services, housing, and insurance, and emergency preparedness. They also identify the political, social, geographical, and technological factors that compounded the tragedy. Comprehensive and balanced, *City Adrift* provides not only an assessment of what went wrong in the Big Easy during and following Hurricane Katrina but also, more importantly, a road map of what must be done to ensure that such a devastating tragedy is never repeated. *WALNECK'S CLASSIC CYCLE TRADER, JUNE 2006*

Causey Enterprises, LLC, [Producing Women](#) Michele White, 2015-03-02. *Producing Women* examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media, including trash, the dress, wedding photography, Internet, how-to instructions, about zombie walks, brides, nail polish, blogging, DIY crafting, and reborn doll production, *Producing Women* elucidates women's production cultures online and the ways that individuals can critically study and engage with these practices. *Historic Bridges* Hojjat Adeli, 2016-04-19

**Racial Reckoning** Renee C. Romano, 2014-10-14. Few whites who violently resisted the civil rights struggle were charged with crimes in the 1950s and 1960s. But the tide of a long deferred justice began to change in 1994 when a Mississippi jury convicted Byron De La Beckwith for the 1963 murder of Medgar Evers. Since then, more than one hundred murder cases have been reopened, resulting in more than a dozen trials. But how much did these public trials contribute to a public reckoning with America's racist past? *Racial Reckoning* investigates that question along with the political pressures and cultural forces that compelled the legal system to revisit these decades-old crimes. A timely and significant work, Romano brilliantly demystifies the false binary of villainous white men like Beckwith or Edgar Ray Killen, who represent vestiges of a violent racial past, with a more enlightened, color-blind society. Considering the current partisan

and racial divide over the prosecution of police shootings of unarmed black men this book is a must read for historians legal analysts and journalists interested in understanding the larger meanings of civil rights or racially explosive trials in America
