Cognitive and Metacognitive Problem-Solving Strategies in Post-16 Physics Ronald Mazorodze, Michael J.

Reiss, 2019-09-20 This book reports on a study on physics problem solving in real classrooms situations Problem solving plays a pivotal role in the physics curriculum at all levels However physics students performance in problem solving all too often remains limited to basic routine problems with evidence of poor performance in solving problems that go beyond equation retrieval and substitution Adopting an action research methodology the study bridges the research practical divide by explicitly teaching physics problem solving strategies through collaborative group problem solving sessions embedded within the curriculum Data were collected using external assessments and video recordings of individual and collaborative group problem solving sessions by 16-18 year olds The analysis revealed a positive shift in the students problem solving patterns both at group and individual level Students demonstrated a deliberate well planned deployment of the taught strategies The marked positive shifts in collaborative competences cognitive competences metacognitive processing and increased self efficacy are positively correlated with attainment in problem solving in physics However this shift proved to be due to different mechanisms triggered in the different students

Application-driven Quantum And Statistical Physics: A Short Course For Future Scientists And Engineers - Volume 3: Transitions Jean-michel Gillet, 2020-06-18. Bridging the gap between traditional books on quantum and statistical physics, this series is an ideal introductory course for students who are looking for an alternative approach to the traditional academic treatment. This pedagogical approach relies heavily on scientific or technological applications from a wide range of fields. For every new concept introduced, an application is given to connect the theoretical results to a real-life situation. Each volume features in-text exercises and detailed solutions with easy-to-understand applications. This third volume covers several basic and more advanced subjects about transitions in quantum and statistical physics. Part I describes how the quantum statistics of fermions and bosons differ and under what condition they can merge into the classical particle statistics framework seen in Volume 2. This section also describes the fundamentals of conductors, semiconductors, superconductors, superfluids and Bose-Einstein condensates. Part II introduces time-dependent transitions between quantum states. The time evolution of a simple two-level model gives the minimum background necessary to understand the principles behind lasers and their numerous applications. Time-dependent perturbation theory is also covered, as well as standard approaches to the scattering of massive particles. A semi-classical treatment of electromagnetic field-matter interaction is described with illustrations taken from a variety of processes such as phonon scattering, charge distribution or spin densities. The third and last part of the book gives a brief overview of quantum electrodynamics with applications to photon absorption or emission spectroscopies and a range of scattering regimes. There follows a short introduction to the role of multiphoton processes in quantum entanglement-based experiments.

Demythologizing Educational Reforms Arthur T. Costigan, Leslee Grey, 2014-08-21. There are dozens of myths surrounding educational reform today: maintaining the school's role in economic competitiveness, the deficiency of teachers, the benefits of increased testing and the worthiness of privatization. In this volume, the editors argue that this discussion has been co-opted to reflect the values and worldviews of special interest groups such as elites in power, politicians, corporate educational foundations and the media. Prominent educational writers tackle contemporary issues such as neoliberalism, suburban

schooling charter schools and parental involvement They expose the logic behind the talk and critically examine these problematic beliefs to uncover meaningful improvements in education which are better grounded in the social economic political and educational realities of contemporary society *Sanathana Sarathi English Volume 07 (2012 - 2021)* Sri Sathya Sai Media Centre, 2022-11-12 Started in 1958 Sanathana Sarathi is a monthly magazine devoted to Sathya Truth Dharma Righteousness Shanti Peace and Prema Love the four cardinal principles of Bhagawan Baba's philosophy It is published from Prasanthi Nilayam the Abode of Highest Peace and acts as a mouthpiece of Baba's Ashram as it speaks of the important events that take place in His sacred Abode besides carrying Divine Messages conveyed through Divine Discourses of Bhagawan Sri Sathya Sai Baba The word meaning of Sanathana Sarathi is the Eternal Charioteer It signifies the presence of the Lord in every being as the atma guiding their lives like a charioteer It implies that he who places his life the body being likened to a chariot in an attitude of surrender in the hands of the Lord will be taken care of by the Lord even as a charioteer would take the occupant of his chariot safely to its destination The magazine is an instrument to disseminate spiritual knowledge for the moral physical and mental uplift of humanity without any discrimination as the subject matter discussed therein is always of common interest and of universal appeal The fifteen Vahinis streams of sacredness known as the Vahini Series comprising annotation and interpretation of the Upanishads and other scriptures Itihasas like the Ramayana the Bhagavatha and the Mahabharata and authentic explanations on Dhyana Dharma Prema etc have been serially published in this magazine as and when they emanated from the Divine pen of Bhagawan Baba This magazine is published in almost all Indian languages English and Telugu from Prasanthi Nilayam and others from respective regions Every year Sanathana Sarathi comes out with a special issue in November commemorating the Divine Birthday The English and Telugu magazines are posted on the 10th and 23rd respectively of every month from Prasanthi Nilayam This magazine has wide ever increasing circulation in India as well as abroad as the study of it brings the reader closer to the philosophy of the Avatar in simple understandable language **THUS SPAKE SAI** Discoursing during the launch of Sanathana Sarathi From this day our Sanathana Sarathi will lead to victory the cohorts of truth the Vedas the Sastras and similar scriptures of all faiths against the forces of the ego such as injustice falsehood immorality and cruelty This is the reason why it has emerged This Sarathi will fight in order to establish world prosperity It is bound to sound the paean of triumph when universal Ananda is achieved

Love, Money, and Parenting Matthias Doepke,Fabrizio Zilibotti,2020-11-03 Doepke and Zilibotti investigate how economic forces shape how parents raise their children They show that in countries with increasing economic inequality such as the United States parents push harder to ensure their children have a path to security and success Economics has transformed the hands off parenting of the 1960s and 70s into a frantic overscheduled activity Growing inequality has also resulted in an increasing parenting gap between richer and poorer families raising the disturbing prospect of diminished social mobility and fewer opportunities for children from disadvantaged backgrounds The authors discuss how investments in early childhood development and the design of education systems factor into the parenting equation and how economics can help shape policies that will contribute to the ideal of equal opportunity for all From publisher description
