Reimers, 2023-09-20 This open access book provides an analysis of the effects of the COVID 19 Pandemic on diverse education systems and of the results of the policies adopted to sustain educational opportunities Through a series of diverse national case studies the book examines the preexisting fragilities and vulnerabilities in educational structures which shaped the nature of the varied responses around the world to teaching and learning during the worst crisis in public education in recent history The chapters in the book take stock of how educational opportunities changed in various education systems around the world as a result of the Covid 19 pandemic answering the question of what did education systems and societies learn about education as a result of the pandemic The book covers diverse education systems with varying levels of resources and facing distinct education challenges including Brazil Chile Finland Japan Mexico Norway Portugal Russia Singapore Spain South Africa and the United States Wetland Management and Sustainable Livelihoods in Africa Adrian Wood, Alan Dixon, Matthew McCartney, 2013-06-19 In this book the authors argue for a paradigm shift in the way African wetlands are considered Current policies and wetland management are too frequently underpinned by a perspective that views agriculture simply as a threat and disregards its important contribution to livelihoods In rural areas where people are entrenched in poverty wetlands in particular wetland agriculture have a critical role to play in supporting and developing peoples livelihoods Furthermore as populations rise and climate change takes grip they will be increasingly important The authors argue that an approach to wetland management that is much more people focused is required That is an approach that instead of being concerned primarily with environmental outcomes is centred on livelihood outcomes supported by the sustainable use of natural wetland resources The authors stress the need for Integrated Water Resource Management and landscape approaches to ensure sustainable use of wetlands throughout a river catchment and the need for wetland management interventions to engage with a wide range of stakeholders They also assess the feasibility of creating incentives and value in wetlands to support sustainable use Drawing on nine empirical case studies this book highlights the different ways in which sustainable use of wetlands has been sought each case focusing on specific issues about wetlands agriculture and livelihoods
