## **June Exemplars 2014 For All Subjects:**

**High-Level Adaptation and Aftereffects** Rocco Palumbo, Stefania D'Ascenzo, Luca Tommasi, 2017-04-28 Aftereffects generally occur after a prolonged exposure adaptation to a first stimulus possessing one given property followed by presentation of a stimulus bearing a neutral value of that property The aftereffect consists in a change in appearance of the neutral stimulus following the adapter compared to the appearance of the neutral stimulus when it is perceived without any previous exposure to the adapter The transient phenomena of perceptual aftereffects are believed to depend on the activation of neuron populations that respond selectively to a given property of the stimuli Studying how adaptation occurs which stimulus properties are sensitive to it which timings are necessary whether individual differences modulate its occurrence has thus become an indirect way to probe the plasticity of sensory functions in the nervous system recently extending to more cognitive and representational aspects of neural coding In the last two decades indeed it has been demonstrated that aftereffects occur not only for low level properties of stimuli such as motion color or orientation but also for high level properties Many studies have proven that high level properties of the stimuli e g gender identity ethnicity or age of a face or a voice are sensitive to this phenomenon It has been shown for example that the prolonged exposure to a female or male face produces a gender misperception in the opposite direction when an androgynous face is shown after the adapter Furthermore recent studies have also shown that aftereffects are not strictly contingent upon the physical features that make up stimuli but they seem to run across the high level properties subjects are adapted to These evidences are supported by cross category adaptation studies which underlie how aftereffects occur even across stimuli that do not share physical features e g bodies and faces but that instead share common higher level properties such as gender Given the growing body of research focused on adaptation and aftereffects in high level perception at the boundaries with perceptual learning attention and cognition the purpose of this topic is to provide a picture of the state of the art relative to the specific phenomena of adaptation in high level perceptual processing

**From Social Harm to Zemiology** Victoria Canning, Steve Tombs, 2021-03-30 This book outlines key developments in understanding social harm by setting out its historical foundations and the discussions which have proliferated since It examines various attempts to conceptualise social harm and highlights key sites of contestation in its relationship to criminology to argue that these act as the basis for an activist zemiology one directed towards social change for social justice The past two decades have seen a proliferation of debate related to social harm in and around criminology From climate catastrophe and a focus on environmental harms unprecedented deaths generating focus on border harms and the coronavirus pandemic revealing the horror of mass and arguably avoidable deaths across the globe critical studies in social harm appear ever more pressing Drawing on a range of international case studies of cultural emotional physical and economic harms From Social Harm to Zemiology locates the study of social harm in an accessible fashion In doing so it sets out how a zemiological lens can move us beyond many of the problematic legacies of

criminology This book rejects criminologies which have disproportionately served to regulate intersectional groups and which have arguably inflicted as much or more harm by bolstering the very ideologies of control in offering minor reforms that inadvertently expand and strengthen states and corporations It does this by sketching out the contours objects methods and ontologies of a disciplinary framework which rejects commonplace assumptions of value freedom From Social Harm to Zemiology advocates social change in accordance with groups who are most disenfranchised and thus often most socially harmed An accessible and compelling read this book is essential reading for all zemiologists critical criminologists and those engaged with criminological and social theory     General George Washington; Exemplar-in-Chief: Major A. J.

Straley,2014-08-15 George Washington was an Exemplar in Chief who had an indelible influence on the nature and character of the early Continental Army an influence that set the precedence and affected how the United States military would interact with civil authority under the new institution of a democratic republic Through an analysis of the historical record there are multiple examples of George Washington s early influence in shaping the nature and character of the United States military Today s American military is a direct descendant of the early Continental Army which fought the War for Independence and was shaped by Washington s influence In analyzing Washington s motives actions to include correspondence and court martial rulings this study will attempt to open a window into understanding Washington s influence on the Continental Army and therefore the American military tradition among the officer corps to the present day Washington was not just a Command in Chief but an Exemplar in Chief who left a lasting impression on the American military structure that has held strong for over two hundred years Through his actions during the creation of the army and leading that army during the Revolution he forever set the framework for the civil military tradition which has never seen a credible or serious military coup The character and nature of today s military will not permit an environment that would allow a military coup to begin This character and nature is a direct result of the profound significance of George Washington s motives in joining the cause and his actions during the struggle Washington s influence is not only significant it cemented the military subordination to civilian authority which has lasted till today     *Invisible, but how? The depth of unconscious processing as inferred from different suppression techniques.* Julien Dubois, Nathan Faivre,2015-02-09 To what level are invisible stimuli processed by the brain in the absence of conscious awareness It is widely accepted that simple visual properties of invisible stimuli are processed however the existence of higher level unconscious processing e g involving semantic or executive functions remains a matter of debate Several methodological factors may underlie the discrepancies found in the literature such as different levels of conservativeness in the definition of unconscious or different dependent measures of unconscious processing In this research topic we are particularly interested in yet another factor inherent differences in the amount of information let through by different suppression techniques In the same conditions of well controlled conservatively established invisibility can we show that some of the techniques in the psychophysical magic

arsenal e.g. masking but also visual crowding, attentional blink etc. reliably lead to higher level unconscious processing than others e.g. interocular suppression. Some authors have started investigating this question using multiple techniques in similar settings. We argue that this approach should be extended and refined. Indeed, in order to delineate the frontiers of the unconscious mind using a contrastive method, one has to disentangle the limits attributable to unawareness itself and those attributable to the technique inducing unawareness. The scope of this research topic is to provide a platform for scientists to contribute insights and further experiments addressing this fundamental question.

[Handbook of Research on Teacher Practices for Diverse Writing Instruction](#) Hodges, Tracey S., 2022-05-20. The art and practice of writing is complex and multidimensional; students often apply unique writing styles. As such, educators must apply focused teaching methods to nurture these unique forms of writing. Educators must stay up to date with the practices for diverse writing instruction in order to best engage with a diverse classroom. However, resources related to writing typically do not focus on the depth and breadth of writing, and there is a need for a resource that offers a comprehensive look at diverse writing instruction research. The Handbook of Research on Teacher Practices for Diverse Writing Instruction provides a rich discussion of the issues, perspectives, and methods for writing instruction currently in use, with an added lens focusing on diversity and equity. It provides unique coverage on the topic of writing instruction for practical implementation within the classroom setting. Covering topics such as student motivation, curriculum development, and content area instruction, this major reference work is an essential resource for preservice teachers, faculty, and administration of K-12 and higher education academic libraries, government officials, school boards, researchers, and academicians.

**Introduction to Human Communication** Susan R. Beauchamp, Stanley J. Baran, 2024-02-16. In Introduction to Human Communication, Third Edition, authors Susan R. Beauchamp and Stanley J. Baran show students how central successful communication is to gaining effective control over perception, meaning, making, and identity.

**Congressional Record**, [Design Recommendations for Intelligent Tutoring Systems](#) Robert Sottolare, Arthur Graesser, Xiangen Hu, Keith Brawner, 2015-07-05. Design Recommendations for Intelligent Tutoring Systems (ITSs) explores the impact of intelligent tutoring system design on education and training. Specifically, this volume examines Authoring Tools and Expert Modeling Techniques. The Design Recommendations book series examines tools and methods to reduce the time and skill required to develop Intelligent Tutoring Systems with the goal of improving the Generalized Intelligent Framework for Tutoring (GIFT). GIFT is a modular, service-oriented architecture developed to capture simplified authoring techniques, promote reuse, and standardization of ITSs along with automated instructional techniques and effectiveness evaluation capabilities for adaptive tutoring tools and methods.

**Waste Policy** Alexander Gillespie, 2015-08-28 From human waste to nuclear waste the question of how we must manage what we no longer want in terms of either recycling or disposal is one of the most pressing issues in environmental law Alexander Gillespie addresses the gaps in previous literatu Hermann Paul's 'Principles of Language History' Revisited

Peter Auer, Robert W. Murray, 2015-07-31 Hermann Paul's *Prinzipien der Sprachgeschichte* served as the most important codification and development of Neogrammarian thought for more than four decades. Four well-known linguists have translated specially selected chapters of the *Prinzipien* into English and provide their reflections on Hermann Paul's contribution on a range of topics.

**Employees' Intellectual Property Rights** Sanna Wolk, Kacper Szkalej, 2016-04-24 In today's knowledge-based global economy, most inventions are made by employed persons through their employers' research and development activities. However, methods of establishing rights over an employee's intellectual property assets are relatively uncertain in the absence of international solutions. Given that increasingly more businesses establish entities in different countries and more employees co-operate across borders, it becomes essential for companies to be able to establish the conditions under which ownership subsists in intellectual property created in employment relationships in various countries. This comparative law publication describes and analyses employers' acquisition of employees' intellectual property rights first in general and then in depth. This second edition of the book considers thirty-four different jurisdictions worldwide. The book was developed within the framework of the International Association for the Protection of Intellectual Property (AIPPI), a non-affiliated non-profit organization dedicated to improving and promoting the protection of intellectual property at both national and international levels. Among the issues and topics covered by the forty-nine distinguished contributors are the following: different approaches in different law systems; choice of law for contracts; harmonizing international jurisdiction rules; conditions for recognition and enforcement of foreign judgments; employees' rights in copyright; semiconductor chips; inventions; designs; plant varieties; and utility models, on a country-by-country basis; employee remuneration; right parties; duty to inform; and instances for disputes. With its wealth of information on an increasingly important subject for practitioners in every jurisdiction, this book is sure to be put to constant use by corporate lawyers and in-house counsel everywhere. It is also exceptionally valuable as a thorough resource for academics and researchers interested in the international harmonization of intellectual property law.

Against Individualism Henry Rosemont Jr., 2015-03-25 The first part of *Against Individualism*, A Confucian Rethinking of the Foundations of Morality, Politics, Family, and Religion, is devoted to showing how and why the vision of human beings as free, independent, and autonomous individuals is and always was a mirage that has served liberatory functions in the past but has now become pernicious for even thinking clearly about much less achieving social and economic justice, maintaining democracy, or addressing the manifold environmental and other problems facing the world today. In the second and larger part of the book, Rosemont proffers a different vision of being human gleaned from the texts of classical Confucianism, namely that we are first and foremost interrelated and thus interdependent persons whose uniqueness lies in the multiplicity of roles we each live throughout our lives. This leads to an ethics based on those mutual roles in sharp contrast to individualist moralities but which nevertheless reflect the facts of our everyday lives very well. The book concludes by exploring briefly a number of implications of this vision for thinking differently about politics, family, life.

justice and the development of a human centered authentic religiousness This book will be of value to all students and scholars of philosophy political theory and Religious Chinese and Family Studies as well as everyone interested in the intersection of morality with their everyday and public lives
