*The Role of the Indian Ocean for Global Peace – Interdisciplinary Issues* Dr. (Capt.) Vivek Jain, 2023-11-02 This book deals with the various interdisciplinary issues of the Indian Ocean individually and collectively such as its history geography nautical elements economics trade routes old and new blue economy deep sea mining fisheries management tourism scourge of piracy pollution Law of the Sea UNCLOS 1982 and the different perspectives of its littoral countries on geopolitics international law international relations and maritime partnerships It is the most important ocean in the world 33% of the global population lives in the area and 50-60% of the world's maritime trade transits through it In addition around 60% of global oil and 26% of global gas reserves along with pristine beaches are located here To comprehend the interdisciplinary issues the editor embarked on a voyage to discover persuade and collaborate with exceptionally brilliant influential experts from prominent littoral countries India Indonesia Iran South Africa Malaysia and Singapore with relevant experience to expound the above subject areas In addition geopolitical conflicts hostilities and trade wars are on the rise war seems inevitable but not imminent Any conflict is likely to originate in other oceans and seas but will end up impacting the Indian Ocean's littoral countries Accordingly these countries must comprehend the interdisciplinary issues and the special role of the Indian Ocean to prevent all encompassing wars hostilities from widening at a global level and thereafter must flesh out plans to shield themselves They must also understand the area's role in working towards global peace by comprehending the above interdisciplinary issues The role of the Indian Ocean in global peace can only be achieved through maritime partnerships between its littoral countries and their avoidance of impulses to invite outside powers to balance each other's power However maritime partnerships are easier said than done At the very least the maritime partnership between two

major Indian Ocean littoral powers India and Indonesia is critical to shield the region from geopolitical firestorms Hopefully this maritime partnership s tactic of embracing a carrot and stick approach will eventually persuade global powers from outside the Indian Ocean region to improve their conduct to achieve global peace **Votes at 16** Ben Kisby, Lee Jerome, 2025-02-20 Votes at 16 weaves together arguments and evidence to present a compelling case in favour of lowering the voting age in Britain to 16 By setting out the key reasons why the voting age should be reduced for all elections this book powerfully refutes the arguments advanced by opponents of reform to the electoral franchise Situating votes at 16 in its historical context in Britain it offers an overview of voting age reform over time and examines the rise of this issue over the last 20 years It analyses evidence on the introduction of votes at 16 in six countries and argues that this demonstrates 16 and 17 year olds possess the knowledge and skills to vote The book also sets out how citizenship education can be enhanced to support the introduction of votes at 16 The Mutual Housing Experiment Kristin M Szylvian, 2015-06-12 In the series Urban Life Landscape and Policy edited by Zane L Miller David Stradling and Larry Bennett **Sick Schools** David V. Anderson, 2020-01-10 Who s afraid of for profit education Those who work in non profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What s more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What organizations provide food and who pays for the food Food is provided by for profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can t education be provided similarly using education stamps We trust for profit enterprises to provide our food Why can t we trust for profit enterprises to provide K 12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers *Mastering Primary History* Karin Doull, Christopher Russell, Alison Hales, 2019-02-21 Mastering Primary History introduces the primary history curriculum and helps trainees and teachers learn how to plan and teach inspiring lessons that make learning history irresistible Topics covered include Current developments in history History as an irresistible activity History as a practical activity Skills to develop in history Promoting curiosity Assessing children in history Practical issues This guide includes examples of children s work case studies readings to reflect upon and reflective questions that all help to show students and teachers what is considered to be best and most innovative practice and how they can use that knowledge in their own teaching to the greatest effect The book draws on the experience of three leading professionals in primary history Karin Doull Christopher Russell and Alison Hales to provide the essential guide to teaching history for all trainee primary teachers Changing the Food Game Lucas Simons, 2017-09-08 By 2050 the world s population is estimated to grow to 10 billion To feed everyone we will have to double our food production to

produce more food in the next 40 years than in the whole of the last 6 000 Changing the Food Game shows how our unsustainable food production system cannot support this growth In this prescient book Lucas Simons argues that the biggest challenge for our generation can only be solved by effective market transformation to achieve sustainable agriculture and food production Lucas Simons explains clearly how we have created a production and trading system that is inherently unsustainable But he also demonstrates that we have reason to be hopeful from a sustainability race in the cocoa industry to examples of market transformation taking place in palm oil timber and sugarcane production He also poses the question where next Provocative and eye opening Changing the Food Game uncovers the real story of how our food makes it on to our plates and presents a game changing solution to revolutionize the industry *Superpower* Ian Bremmer,2015-05-19

Geopolitical thought leader Ian Bremmer issues a clarion call to America redefine your place in the world or the world will define it for you America s identity abroad has long been defined by the second World War and years of Cold War struggle But the new America has changed its role and identity are in flux and with them the global balance of power In Three Choices for a Superpower president and founder of the Eurasia Group Ian Bremmer calls for a completely new definition of America as a superpower one that adheres to distinct priorities and values He outlines the three choices facing the new America Be independent America does not have an endless supply of blood and finances to spend on other nations Rather America will fare much better if it devotes its energies and resources to rebuilding strength from within Moneyball America cannot afford every foreign fight in support of American values but they must defend their interests wherever they are threatened They must make tough decisions intelligently with an open admission of America s limitations Be indispensable To think that America can operate autonomously from the rest of the world is not only ignorant but also extremely dangerous The world relies on American leadership and America has international interests they must continue their role as an indispensable nation and remain actively involved abroad As the 2016 presidential election approaches America needs to define its responsibilities opportunities and most importantly its limits A foreign policy divided against itself cannot stand as the world s greatest superpower America must choose which path it will follow into the future **Target NTSE Class 10**

Klinger,2018-01-15 Rare Earth

Frontiers is a work of human geography that serves to demystify the powerful elements that make possible the miniaturization of electronics green energy and medical technologies and essential telecommunications and defense systems

Julie Michelle Klinger draws attention to the fact that the rare earths we rely on most are as common as copper or lead and this means the implications of their extraction are global Klinger excavates the rich historical origins and ongoing ramifications of the quest to mine rare earths in ever more impossible places Klinger writes about the devastating damage to lives and the environment caused by the exploitation of rare earths She demonstrates in human terms how scarcity myths have been conscripted into diverse geopolitical campaigns that use rare earth mining as a pretext to capture spaces that have historically fallen beyond the grasp of centralized power These include legally and logistically forbidding locations in the Amazon Greenland and Afghanistan and on the Moon Drawing on ethnographic archival and interview data gathered in local languages and offering possible solutions to the problems it documents this book examines the production of the rare earth frontier as a place a concept and a zone of contestation sacrifice and transformation
