Czech (& Central European) Yearbook of Arbitration - Borders of Procedural and Substantive Law in Arbitral Proceedings - 2013 Alexander J. Bělohávek, Filip Cerný, Naděžda Rozehnalova, 2013-03-01 The Czech Yearbooks Project for the moment made up of the Czech Yearbook of International Law and the Czech Central European Yearbook of Arbitration began with the idea to create an open platform for presenting the development of both legal theory and legal practice in Central and Eastern Europe and the approximation thereof to readers worldwide This platform should serve as an open forum for interested scholars writers and prospective students as well as practitioners for the exchange of different approaches to problems being analyzed by authors from different jurisdictions and therefore providing interesting insight into issues being dealt with differently in many different countries The Czech Central European Yearbook of Arbitration the younger twin project within the Czech Yearbooks primarily focuses on the problematic of arbitration from both the national and international perspective The use of arbitration as a method of dispute resolution continues to increase in importance Throughout Central and Eastern Europe arbitration is viewed as being progressive due to its practical aspects and to its meeting the needs of specialists in certain practice areas Central and Eastern Europe the primary but not exclusive focus of this project is steeped in the Roman tradition of continental Europe in which arbitration is based on the autonomy of the parties and on informal procedures This classical approach is somewhat different from the principles on which the system of arbitration in common law countries is based Despite similarities among countries in the region arbitration in Central and Eastern Europe represents a highly particularized and fragmented system One shortcoming in the use of arbitration in Central and Eastern Europe is the absence of comparative standards or a baseline that would facilitate the identification of commonalities and differences in individual countries and help resolve problems that are common throughout the region The CYArb project aims to address this issue and provide a forum for comparisons of arbitration practice and doctrine in countries within the region and in relation to practices internationally It sheds light on both practical and academic aspects within these countries and compares those approaches to broader European and international practices This project will also foster a broad exchange of legal research and other information on the subject The third volume of the CYArb focuses on the blurry area which borders the procedural and substantial law Editors being motivated with an endeavour to provide the readers with complex insight into the problematic invited authors of Civil same as Common law jurisdictions to provide their insight and analysis on the problems of i e mandatory provisions of procedural same as substantive law issues of application of law in arbitration adjudication according to the ex aequo et bono principles issues of the burden and standard of proof and others The issues are presented on highly comparative basis provided mostly by practitioners who are simultaneously involved in academic activities The book is divided into four sections The backbone sections encompass the doctrinal articles of the authors same as case law analysis of the domestic courts from the region relating to the topic covering the case law of Constitutional

General same as Arbitral courts of the countries from the Central European Region The rest of the book covers the news in the arbitration area same as interesting arbitration events or published articles and books of the authors from the region The new volume of the The Czech Central European Yearbook of Arbitration Borders of Procedural and Substantive Law in Arbitral Proceedings Civil versus Common Law Perspectives brings useful resource for everyone who is dealing with arbitration in all of its aspects be it an academic practitioner law or international relations student who seeks global compendium on the issue including an overlap to economic and politic aspects of the problematic Region-Building in Southern Africa Chris Saunders,Gwinyayi Albert Dzinesa,Dawn Nagar,2013-07-04 How successful have Southern African states been in dealing with the major issues that have faced the region in recent years What could be done to produce more cohesive and effective region building in Southern Africa In this original and wide ranging volume which draws on an interdisciplinary team of mainly African and African based specialists the key political socio economic and security challenges facing Southern Africa today are addressed These include the various issues confronting the Southern African Development Community SADC and its institutions such as HIV AIDS migration and xenophobia land grabbing and climate change and the role of the main external actors involved with the region including the United Nations the European Union the United States and China The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions including the Development Bank of Southern Africa and Industrial Development Corporation and issues of gender and peacebuilding In doing so the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation suggesting how region building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world *Application of International Labour Standards 2009 (I)* ,2009 Routledge Handbook of the South China Sea Zou Keyuan,2021-06-28 The Routledge Handbook of the South China Sea presents a comprehensive and in depth analysis of South China Sea issues It evaluates the dynamics of the latest developments and identifies factors that contribute to dispute settlement and a cooperative management regime of one of the most important seas in the world one which not only contains rich marine resources and distinctive biodiversity but is also a critical sea route for global trade and communications The Handbook is divided into six parts each representing a focused area of enquiry History and geostrategic landscape Sovereignty and maritime entitlements South China Sea policies of major claimants Natural resources and environment Cooperation and institutions Challenges and prospects Written by world renowned experts and scholars with specialisms from geography to international law the volume s 25 chapters contribute interdisciplinary perspectives reflecting the impact of how South China Sea policies are shaped by national governments and international organizations As such the Handbook provides an authoritative reference to South China Sea Studies useful for students and scholars of international relations history maritime and Asian studies **Recent Developments in the South China Sea Dispute** Wu Shicun,Nong Hong,2014-05-30 The South China Sea region contains potentially huge deposits of petroleum and natural gas important
