

Bicycles Today - what are they made from?

Bicycles are made in factories. Mostly the frame is made from steel. It is strong and won't rust when it gets wet. Sometimes frames are made from aluminium which is also a metal but much lighter than steel. Frames can even be made from bamboo!

The handlebars are often made from stainless steel which is shiny and attractive. The tyres are made from rubber which is soft, strong and flexible. Rubber is made from a juice which comes from a rubber tree.

The seat is made from foam, which is soft and comfortable, covered in plastic or leather which are both waterproof.
