System Leadership Susan Cousin, 2019-03-21 System leadership defined as leading

beyond a single institution is a feature of the English education system which has been heralded as both the solution to school improvement and an extension to the school leadership career ladder However claims that it evidences a change of governance towards increasing self regulation of the education system are contested Susan Cousin explores the governance and policy perspectives of system leadership She captures rich narratives over several years from the lived experience of system leaders headteachers they worked with and those brokering the relationships The daily realities of the challenges they faced include tensions arising from conflicted governance environments where autonomy coexists with accountability and collaboration with competition Identifying four types of system leader the Hero head the Auditor the Protector and the Collaborator she presents a conceptual model of system leadership practice A clear explanation of how different approaches affect power relationships the nature of trust and types of learning the model can be used to inform decisions made by current and future system leaders and those who make policy The book concludes by reaffirming the power of system leadership to deliver educational reform and the need to avoid unintended consequences including the fragmentation of the system and increased inequality

The Tail Paul Marshall, 2013-02-28 At the heart of the debate about state provided education in the UK lies a shocking fact one child in five leaves school in England without basic skills in literacy and numeracy Despite the best efforts of reformers and rapidly improving results in academies and elsewhere even some of the best schools are struggling to help the tail the lowest achieving twenty or thirty per cent of pupils Throughout Britain other schools local authorities and even regions are trapped in a rut of low ambition and poor performance and seem unable to address the problem The young people in the tail will find it hard to progress to the qualifications they need to get good jobs and are unlikely to find secure employment Their blighted lives are a personal tragedy and one that imposes a wider economic and social cost that increases with every generation In this book eighteen of Britain's leading educational practitioners and specialists examine why our education system is persistently failing so many young people and they propose a range of practical and achievable solutions This urgently needed and powerfully argued manifesto demands the closest attention and will galvanise public debate on education

Quantifying Neighbourhood Effects Jorg Blasius, Jurgen Friedrichs, George Galster, 2013-10-31
Many policies in several Western European countries and the U S aim to counter spatial concentrations of deprivation and create more socio economically mixed residential areas Such policies are founded on the belief that neighbourhoods have a strong and independent effect upon the well being and life chances of individuals The adequacy of the evidence base to support this position has been the subject of spirited debate on both sides of the Atlantic The primary purpose of this book is to contribute to this policy relevant discussion by presenting new scholarship from many countries that rigorously quantifies various sorts of neighbourhood effects through the use of cutting edge social scientific techniques The secondary purpose of this book is to introduce these techniques to a wider array of housing and planning researchers and to show how a variety of disciplines have offered insightful synergistic perspectives Research on neighbourhood effects has over the last 15 years led to a body of knowledge extending far beyond the sociological urban research where it originated The problem of quantifying neighbourhood effects and the use of associated methodologies like multi level analysis instrumental variables has attracted scholars from criminology sociology social geography economics and health science and thus serves as a critical locus for interdisciplinary scholarship This book was previously published as a special issue of Housing Studies
