M. Alareeni,Islam Elgedawy,2023-08-26 Artificial intelligence AI has the potential to significantly improve efficiency reduce costs and increase the speed and accuracy of financial decision making making it an increasingly important tool for financial professionals One way that AI can improve efficiency in finance is by automating tasks and processes that are time

consuming and repetitive for humans For example AI algorithms can be used to analyze and process large amounts of data such as financial statements and market data in a fraction of the time that it would take a human to do so This can allow financial professionals to focus on higher value tasks such as interpreting data and making strategic decisions rather than being bogged down by mundane tasks AI can also reduce costs in finance by increasing automation and eliminating the need for certain tasks to be performed manually This can result in cost savings for financial institutions which can then be passed on to customers in the form of lower fees or better services AI can be used to identify unusual patterns of activity that may indicate fraudulent behavior This can help financial institutions reduce losses from fraud and improve customer security AI powered chatbots and virtual assistants can help financial institutions provide faster more efficient customer service particularly when it comes to answering common questions and handling routine tasks Some financial institutions are using AI to analyze market data and make trades in real time AI powered trading algorithms can potentially make faster and more accurate trading decisions than humans In terms of speed and accuracy AI algorithms can analyze data and make decisions much faster than humans and can do so with a high degree of accuracy This can be particularly useful in fast moving financial markets where quick and accurate decision making can be the difference between success and failure This book highlights how AI in finance can improve efficiency reduce costs and increase the speed and accuracy of financial decision making Moreover the book also focuses on how to ensure the responsible and ethical use of AI in finance This book is a valuable resource for students scholars academicians researchers professionals executives government agencies and policymakers interested in exploring the role of artificial intelligence AI in finance Its goal is to provide a comprehensive overview of the latest research and knowledge in this area and to stimulate further inquiry and exploration

**Abu Mayanja, MP** A. B. K. Kasozi, 2024-02-01 This book Abu Mayanja MP The intellectual star of Uganda's Struggle for independence and the search for a liberal democratic state 1929 2005 is a biography of a brilliant African politician a history of a country and a continent told through the lens and activities of an individual politician The book breaks new ground in how Uganda and Africa have been viewed by academic and popular opinion Mayanja's life sheds light on the last days of colonialism and the early postcolonial history of Uganda and other African countries First although Africa particularly Uganda is viewed by popular imagination through the images of dictatorial and corrupt African leaders like Amin Obote Mubutu Bokassa Bongo and others there were and still are voices of reason who advocated for the advantages of good governance Secondly it shows that it is not only heads of states who influenced the political direction of postcolonial states in the period just before and after independence Other actors shaped the opinions of the masses and influenced how laws were formed and implemented Thirdly Mayanja is one of those public intellectuals who stood up to autocracy and what he thought should be done through words and actions He analysed political and social issues at a higher conceptual level than almost all his contemporaries He was indeed the intellectual star of Uganda's struggle for self rule and the nine years that followed independence His ridiculing of those in power for their failure to know or understand governance issues landed him in prison and denied him full participation in governing the Uganda postcolonial state But he left deep footprints on Uganda's and East African political thought Had his suggestions for managing postcolonial Uganda been followed the country would not have suffered as severely as it has since 1966

*Routledge Handbook of Environmental Journalism* David B. Sachsman, JoAnn Myer Valenti, 2020-05-14 The Routledge Handbook of Environmental Journalism provides a thorough understanding of environmental journalism around the world An increasing number of media platforms from newspapers and television to Internet social media networks are the major

With contributions from around the world broken down into five key regions—the United States of America, Europe, Russia, Asia, and Australia, Africa, and the Middle East and South America—this book provides support for today's environment reporters, the providers of essential news in the 21st century. As a scholarly and journalistic work written by academics and the environmental reporters themselves, this volume is an essential text for students and scholars of environmental communication, journalism, and global environmental issues, more generally, as well as professionals working in this vital area.

Research Universities in Africa Cloete, Nico, Bunting, Ian, 2018-11-09. From the early 2000s, a new discourse emerged in Africa and the international donor community that higher education was important for development in Africa. Within this zeitgeist of converging interests, a range of agencies agreed that a different collaborative approach to linking higher education to development was necessary. This led to the establishment of the Higher Education Research and Advocacy Network in Africa (Herana) to concentrate on research and advocacy about the possible role and contribution of universities to development in Africa. This book is the final publication to emerge from the Herana project. The project has also published more than 100 articles, chapters, reports, manuals, and datasets, and many presentations have been delivered to share insights gained from the work done by Herana. Given its prolific dissemination, it seems reasonable to ask whether this fourth and final publication will offer the reader anything new. This book is certainly different from previous publications in several respects. First, it is the only book to include an analysis of eight African universities based on the full 15 years of empirical data collected by the project. Second, previous books and reports were published mid-project. This book has benefited from an extended gestation period, allowing the authors and contributors to reflect on the project without the distractions associated with managing and participating in a large-scale project. For the first time, some of those who have been involved in Herana since its inception have had the opportunity to at least make an attempt to see part of the wood for the trees. Different does not necessarily mean new. An emphasis on the newness of the data and perspectives presented in this book is important because it shows that it is more than a historical record of a donor-funded project. Rather, each chapter in this book brings to a lesser or greater extent something new to our understanding of universities, research, and development in Africa.
