**The Leadership Imperative** Andrew Spencer, 2014-08-11. This innovative work combines the fields of e-tourism adoption and strategic management and identifies the combination of antecedents of technology adoption by distilling factors to identify the key determinant of the adoption of the internet for sales and marketing purposes in small owner-managed travel firms. While it focuses on travel firms in Jamaica, it examines the general issue of firm characteristics which are associated with adoption behaviour such as strategy and resources as well as external factors such as culture and the digital divide. In addition to external and firm factors, personal factors such as ownership and leadership are explored at various stages of adoption. The findings indicate that the role of leadership is much more significant than has been previously posited, and this book therefore recommends a new theoretical model with practical implications for determining technology adoption.

**Systems Analysis and Design in a Changing World** John W. Satzinger, Robert B. Jackson, Stephen D. Burd, Richard Johnson, 2004. Systems analysis and design in a changing world.

**Technology Adoption in the Caribbean Tourism Industry** Andrew Spencer, 2020-10-31. By examining the decision-making process in tourism companies deciding whether to become more dependent on digital capabilities and artificial intelligence, this text seeks to understand the role of strategy and resources in technology adoption. Further, the author assesses the role of factors both external (such as culture) and internal (such as leadership) in this strategic process. Economies in the Caribbean are reliant on tourism to bring prosperity to the region, and with the onset of the COVID-19 pandemic, the industry is being forced to transform the way it operates. With implications for those studying organizational behavior as well as strategic and tourism management, this study analyzes rapid change in this pivotal industry.

Beyond Integrity Scott Rae, Kenman L. Wong, 2009-05-26 Integrity is essential to Judeo Christian business ethics. But today's business environment is complex. Those in business and those preparing to enter the business world need to grapple with the question of how integrity and biblical ethics can be applied in the workplace. They need to go beyond integrity in their thinking. Beyond Integrity is neither excessively theoretical nor simplistic and dogmatic. Rather, it offers a balanced and pragmatic approach to a number of concrete ethical issues. Readings from a wide range of sources present competing perspectives on each issue, and real-life case studies further help the reader grapple with ethical dilemmas. The authors conclude each chapter with their own distinctly Christian commentary on the topic covered. This third edition has been revised to provide the most up-to-date introduction to the issues Christians face in today's constantly changing business culture. Revisions include 30 new case studies, 13 new readings, 50% substantially revised sidebars that reflect the issues in the news, and business press summaries and material for discussion.

Selecting and Implementing Technologies in Libraries Tod Colegrove, 2022-09-14 New technology and services are fundamental to maintaining the relevance of libraries today, but which technologies and/or services make sense to implement and which to avoid? Building from a framework drawn in the overlap of design thinking with best practices in emerging technology and library practice, this book is a go-to guide for the active library practitioner and LIS student alike. From the 3D printers and laser cutters of today's library makerspace to collection development and library outreach, this primer offers clear examples that illustrate the practical and collaborative approach that ensures alignment and increases the likelihood of success. Written as a textbook for LIS students in the crossover areas of emerging technology, design thinking, and library management, the book will also meet the needs of the active library practitioner in public, academic, and special libraries, both those new to the field and seasoned professionals. The practical treatment and examples provided will be of interest and immediate use. Questions at the end of each chapter give readers an opportunity to think about the concepts presented. The book is also designed to let the enduring values of librarianship and library practice shine through, guiding the reader to navigate the future of library technology.
