Manual For The Autovision System:

Robotics and Factories of the Future '87 R. Radharamanan, 2012-12-06 The papers presented at the Second International Conference on Robotics and Factories of the Future held in San Diego California USA during July 28 31 1987 are compiled in this volume Over two hundred participants attended the conference made technical presentations and discussed about various aspects of manufacturing robotics and factories of the future The number of papers published in this volume and the number of unpublished presentations at the conference indicates the evidence of growing interest in the areas of CAD CAM robotics and their role in future factories The conference consisted of five plenary sessions twenty three technical sessions workshops and exhibits from local industries and educational institutions I wish to acknowledge with many thanks the contributions of all the authors who presented their work at the conference and submitted the manuscripts for publication It is also my pleasure to acknowledge the role of keynote banquet and plenary sessions speakers whose contributions added greatly to the success of the conference My sincere thanks to all session chairmen I wish that the series of the International Conferences on Robotics and Factories of the Future which was initiated in 1984 in Charlotte North Carolina will have a major impact on the use of robots and computers in the automated factories of the future Machine Vision Richard K. Miller, Nello Zeuch, 1989-08-31 Aimed at manufacturing managers and engineers looking for an introduction to computer vision and its potential this book discusses the areas in which machine vision is being used explains different types of machine vision hardware and software and summarizes research at several universities **7th Int. Conf. Industrial & En** Frank D. Anger, Rita V. Rodriguez, Moonis Ali, 1994-05-23 Over the years the promise of artificial intelligence has inspired many researchers and many schemes only to have incipient hopes thwarted by its complexity With each generation of computational engines a new wave of enthusiasm sweeps the community as solutions to a few problems come within reach However intractability and undecidability continue to frustrate the unwary practitioner while unsubstantiated methodologies offer ingenious solutions that hold more promise than potential Despite its undulate past and variegated present AI has made solid contributions to a growing information technology Expert systems and allied tools have become a mainstay of industrial and business organizations intelligent interfaces have increased accessibility of computational resources and robotic innovations have redefined the manufacturing industries Meanwhile research in evolutionary algorithms neural networks fuzzy reasoning and other exciting approaches promise continued progress in surprising new directions These proceedings record the latest results of industrial commercial military and academic artificial intelligence exploration Seventy seven papers divided into twenty different areas document a significant slice of this broad and exciting field Although dozens of themes are treated in the papers the topical divisions of this volume comprise The Software Engineering AI Interface Knowledge Based Systems Temporal Reasoning Machine Learning Robotics Intelligent Databases Planning Expert Systems Applications Search Techniques Genetic and Evolutionary Methods Design Qualitative Reasoning Neural Networks
