Meaning And Textuality:

Meaning and Textuality François Rastier, Frank Collins, Paul Perron, 1997 Rastier proposes a theoretical framework for the semantic description and typology of texts establishing a critical debate among various streams of research before arriving at a synthesis of literary semiotics, thematic and linguistic semantics

The Event of Meaning in Gadamer's Hermeneutics Carlo DaVia, Greg Lynch, 2024-02-06 This book presents the first detailed treatment of Gadamer's account of the nature of meaning. It argues both that this account is philosophically valuable in its own right and that understanding it sheds new light on his wider hermeneutical project. Whereas philosophers have typically thought of meanings as belonging to a special class of objects, the central claim of Gadamer's view is that meanings are events. Instead of a pre-existing content that we must unearth through our interpretive efforts, for Gadamer the meaning of a text is what happens when we encounter it in the appropriate way. In events of meaning, the world makes itself intelligibly present to us in a manner that is uniquely and irreducibly bound up with the concrete situation in which we find ourselves. When we recognize that Gadamer thinks of meaning in this way, we are better positioned to appreciate what his wider views amount to and how they hang together. Gadamer's accounts of interpretive normativity, the aspectual character of understanding and the nature of essences, for example, snap into more vivid relief when we see them as outgrowths of his underlying conception of meanings as events. *The Event of Meaning in Gadamer's Hermeneutics* will especially appeal to researchers and advanced students working in hermeneutics, phenomenology and the philosophy of language. More broadly, it will be of interest to humanities teachers and researchers concerned with the question of how texts from distant cultures can be relevant to readers here and now.

Meaning and Reading Michel Meyer, 1983-01-01 According to the traditional view, meaning presents itself under the form of some kind of identity. To give the meaning of a sentence amounts to being capable of producing some substitute based on the identity of the terms of the sentence. Is then the meaning of a book or of any text the capacity of rewriting it? Instead of retaining a double standard theory of meaning, one for sentences and another for texts, that would allow for an ad hoc gap, the author provides a unified conception called the question view of language. He has developed, known as problematology. He pursues a systematic analysis of questioning in literature and shows how questioning makes the understanding process possible.

Literacy In the first of these Craig A Evans offers a lengthy piece that argues that the archaeological artifactual and historical evidence suggests that New Testament autographs and first copies may well have remained in circulation for one century or more having the effect of stabilizing the text Other pieces in the section address literacy orality and paleography of early Christian papyri In the second section there are five pieces on Writing Reading and Abbreviating Christian Scripture These range across numerous topics including an examination of the stauros cross as a nomen sacrum

Translation as Text Albrecht Neubert, Gregory M. Shreve, 1992 The basic tenet here is that we do not translate words but texts and that these competing models can be integrated into a more global theory of translation by viewing the translation process as a primarily textual process The authors examine in detail the characteristics that make a good translation a text focusing particularly on the empirical relationship between the theory of translation and its practice

Post-Structuralism: A Note on the Philosophical School Pons Malleus, 2025-07-02 This book is an invitation into one of the most challenging provocative and enduring philosophical movements of the late 20th century post structuralism Emerging in the wake of structuralism's systematic approach to language culture and society post structuralism did not so much reject its predecessor as it questioned its foundational certainties It reoriented philosophical inquiry toward ambiguity contingency and the instability of meaning challenging our deepest assumptions about truth identity power and knowledge Post structuralism is not a unified doctrine or a clearly bounded school of thought Rather it is a constellation of thinkers Michel Foucault Jacques Derrida Gilles Deleuze Julia Kristeva Jean Baudrillard and others each charting a unique intellectual path What binds them however loosely is a shared skepticism toward totalizing narratives fixed

categories and objective truths Where structuralism sought underlying systems whether linguistic anthropological or psychoanalytic post structuralism problematized those systems demonstrating how they are shaped by historical contingencies power dynamics and the play of language itself This book does not aim to simplify post structuralism into a set of clear rules or principles nor does it attempt to resolve its many internal tensions Instead it offers a guide through its core concepts difference deconstruction discourse power subjectivity and more while contextualizing them within the broader intellectual and historical landscape From Derrida s unsettling of the metaphysics of presence to Foucault s genealogies of knowledge and power from Deleuze s philosophy of becoming to Kristeva s theories of the abject post structuralism offers a relentless interrogation of the categories that structure thought and society Crucially this book seeks to clarify not codify The writing of many post structuralists is notoriously difficult sometimes maddeningly so This complexity is not a mere stylistic flourish it often reflects the very nature of the questions being asked questions that resist closure and demand a new kind of philosophical literacy Yet with patient reading and careful attention the rewards of engaging with post structuralist thought are profound It offers tools for examining the assumptions beneath our language institutions and identities revealing how what appears natural or self evident is often historically constructed and ideologically motivated This book is for students encountering post structuralism for the first time for scholars seeking a synthetic overview and for readers from other disciplines literature sociology political theory cultural studies who find themselves drawn to its critical promise It is written with the conviction that philosophy is not an abstract self contained enterprise but a living practice that helps us understand and perhaps reshape the world we inhabit In an age increasingly dominated by rigid ideologies identity essentialisms and algorithmic certainties the post structuralist impulse to question foundations to embrace complexity and to remain open to the other feels more urgent than ever Whether one ultimately agrees with its premises or not engaging seriously with post structuralism can sharpen critical awareness and deepen our understanding of the conditions that shape contemporary thought and life
