**Wanted! A Nation!** Claire Bourhis-Mariotti, 2023-12-15 Covering the whole of the nineteenth century Wanted A Nation reveals how Haiti remained a focus of attention for white as well as Black Americans before during and even after the Civil War Before the Civil War Claire Bourhis Mariotti argues the Black republic was considered by free Black Americans as a place where full citizenship was at hand Haiti was essentially viewed and concretely experienced as a refuge during moments when free Black Americans lost hope of obtaining rights in the United States Haiti is also at the heart of this book as Haitian leaders supported the American emigration to Haiti in the 1820s and early 1860s opposed the American geostrategic and diplomatic diktats in the 1870s and 1880s and finally offered an international platform to Frederick Douglass at the 1893 Columbian World s Fair thus helping Black people who faced discrimination at home to fight first against slavery and the slave trade and then for equal rights By spanning the entire nineteenth century Wanted A Nation presents a complex panorama of the emergence of African

**Looking into the Seeds of Time** Y. S. Brenner,2021-12-16 This stunning refreshing work combines the history of economics and the practice of modern development It is predicated on Brenner s view that there is no individual freedom without economic security and that such security depends upon progress in both the natural and social sciences Social institutions determine the pace and direction of technological advancement and scientific and technological achievements determine which forms of social reorganization are possible and which are illusory As all living is action and living implies choices any theory of development must start with the person Economic laws obtain only in relation to specific forms of social existence Advanced societies are

technically capable of providing for basic needs but are not yet convinced of their ability to do so Modern life still reflects the fears of a society still trying to escape the anxieties demons and ghosts of a long dark era of unemployment and starvation The problem of development is the contradiction between technological potentials and cultural inheritances Looking into the Seeds of Time was originally written with the belief that the growing mastery of nature by humanity would curb egoistic impulses and replace competitive with cooperative goals While the same spirit pervades this new edition the work reveals how political as well as economic processes make the goals of prosperity harder to achieve The work reveals a rare insight into the mechanisms of the marketplace and how they can be examined in a comparative historical context across nations as different as the United States Great Britain and Japan and from the Reformation to the modern era of bourgeois consolidation This is institutional economics at its very best
