The Cambridge Handbook of English Corpus Linguistics Douglas Biber, Randi Reppen, 2015-06-25

The Cambridge Handbook of English Corpus Linguistics CHECL surveys the breadth of corpus based linguistic research on English including chapters on collocations, phraseology, grammatical variation, historical change and the description of registers and dialects. The most innovative aspects of the CHECL are its emphasis on critical discussion, its explicit evaluation of the state of the art in each sub discipline and the inclusion of empirical case studies. While each chapter includes a broad survey of previous research, the primary focus is on a detailed description of the most important corpus based studies in this area with discussion of what those studies found and why they are important. Each chapter also includes a critical discussion of the corpus based methods employed for research in this area as well as an explicit summary of new findings and discoveries.

Grammar in ELT and ELT Materials Graham Burton, 2023-06-06

This book investigates the content of the grammar syllabus typically employed in mainstream English Language Teaching. Using a mixed methods approach, the author examines how the syllabuses used in coursebooks are actually constructed, how they evolved and how valid their contents are as a basis for teaching. The research reported consists of a broad exploration of primary sources in order to outline the evolution of ELT pedagogical grammar, ten interviews with key ELT authors and publishing professionals which allows for the investigation of the decision making processes underlying the choice of grammar content in ELT teaching materials and finally the presentation of case studies which examine three areas of grammar, analysing the evolution of their treatment in ELT materials both historical and contemporary and comparing their current treatment to data on real learner use. This book contributes to the literature on syllabus design and pedagogical grammar and builds on existing research into materials design. It will be of interest to researchers and professionals working in the fields of applied linguistics, pedagogical grammar, curriculum design and materials design.
