Irudaya Rajan, 2014-03-21 This volume is a collection of articles dealing with various dimensions of the Global Financial Crisis and its economic and social impact in terms of governance emigration remittances return migration and re integration The crisis

which had its origin in the United States in 2008 spread its economic effects on developed as well as developing countries. Some of these countries were able to recover in the short run while some are in the process of recovery with continuous efforts by both national governments and international agencies. In this backdrop is there any impact on the outflow of emigrants from the countries of origin and inflow of remittances to the countries of destination? The third volume in the annual series India Migration Report answers the question through rigorous quantitative and qualitative analyses and fieldwork both in the Gulf region and South Asia and concludes that both emigration and remittances are more resilient than expected. This report contains findings based on an extensive survey conducted in Kerala has additional evaluations based on other surveys and case studies conducted in different parts of India, Pakistan, Bangladesh, Nepal and Sri Lanka to reflect on the consequences of the global crisis on the countries of origin as well as a quick assessment and site visits to the United Arab Emirates, Kuwait, Qatar and Malaysia. It includes essays that examine the linkages between emigration and remittances based on international data from the World Bank, the International Labour Organization, the International Organization of Migration, the United Nations and other organizations that closely deal with international migration. It will be of interest to students and scholars of migration studies, sociology, law, economics, gender studies, diaspora studies, international relations and demography apart from non-governmental organizations, policy makers and government institutions working in the field of migration.

**Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02

South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

**Criminality at Work** Alan Bogg, Jennifer Collins, Mark Freedland, Jonathan Herring, 2020-03-12

From the Master and Servant legislation to the Factories Acts of the 19th century the criminal law has always had a vital yet normatively complex role in the regulation of work relations. Even in its earliest forms it operated both as a tool to repress collective organizations and enforce labour discipline while policing the worst excesses of industrial capitalism. Recently governments have begun to rediscover criminal law as a regulatory tool in a diverse set of areas related to labour law: modern slavery, penalizing irregular migrants, licensing regimes for labour market intermediaries, wage theft, supporting the enforcement of general labour standards, new forms of hybrid preventive orders, harassment at work and industrial protest. This volume explores the political and regulatory dimensions of

the new criminality at work from a wide range of disciplinary perspectives including labour law immigration law and health and safety regulations The volume provides an overview of the regulatory terrain of criminality at work exploring whether these different regulatory interventions represent politically legitimate uses of the criminal law The book also examines whether these recent interventions constitute a new pattern of criminalization that operates in preventive mode and is based upon character and risk based forms of culpability The volume concludes by reflecting upon the general themes of criminality at work comparatively from Australian Canadian and US perspectives Criminality at Work is a timely rich and ambitious piece of scholarship that examines the many intersections between criminal law and work relations from a historical and contemporary vantage point
