English Paper 2 Ieb 2014 Exemplar:

With and Without Galton N. L. Krementsov, 2018 In 1865 British polymath Francis Galton published his initial thoughts about the scientific field that would become eugenics The same year Russian physician Vasilii Florinskii addressed similar issues in a sizeable treatise entitled Human Perfection and Degeneration Initially unheralded Florinskii's book would go on to have a remarkable afterlife in twentieth and twenty first century Russia In this lucid and insightful work Nikolai Krementsov argues that the concept of eugenics brings together ideas values practices and fears energised by a focus on the future It has proven so seductive to different groups over time because it provides a way to grapple with fundamental existential questions of human nature and destiny With and Without Galton develops this argument by tracing the life story of Florinskii's monograph from its uncelebrated arrival amid the Russian empire's Great Reforms to its reissue after the Bolshevik Revolution its decline under Stalinism and its subsequent resurgence first as a founding document of medical genetics and most recently as a manifesto for nationalists and racial purists Krementsov's meticulously researched biography of a book sheds light not only on the peculiar fate of eugenics in Russia but also on its convoluted transnational history elucidating the field's protean nature and its continuing and contested appeal to diverse audiences multiple local trajectories and global trends It is required reading for historians of eugenics science medicine education literature and Russia and it will also appeal to the general reader looking for a deeper understanding of this challenging subject Publisher's website
