**Racism and Anti-Racism in Canada** David Este,2020-07-10T00:00:00Z Multiculturalism is regarded as a key feature of Canada s national identity Yet despite an increasingly diverse population racialized Canadians are systematically excluded from full participation in society through personal and structural forms of racism and discrimination Race and Anti Racism in Canada provides readers with a critical examination of how racism permeates Canadian society and articulates the complex ways to bring about equity and inclusion both individual and systemically      GB,GBT,GB/T Chinese Standard(English-translated version)-Catalog001- Dr. Meng Yongye CODEOFCHINA,2018-05-04 All English translated Chinese codes are available at [www.codeofchina.com](http://www.codeofchina.com)      **The Education Invasion** Joy Pullmann,2017-03-14 Most Americans had no idea what Common Core was in 2013 according to polls But it had been creeping into schools nationwide over the previous three years and children were feeling its effects They cried over math homework so mystifying their parents could not help them even in elementary school They read motley assortments of informational text instead of classic literature They dreaded the high stakes tests in unfamiliar formats that were increasingly controlling their classrooms How did this latest and most sweeping reform of American education come in mostly under the radar Joy Pullmann started tugging on a thread of reports from worried parents and frustrated teachers and it led to a big tangle of history and politics intrigue and arrogance She unwound it to discover how a cabal of private foundation honchos and unelected public officials cooked up a set of rules for what American children must learn in core K 12 classes and how the Obama administration pressured states to adopt them Thus a federalized education scheme took root despite legal prohibitions against federal involvement in curriculum Common Core and its testing regime were touted as an absolute game changer in public education yet the evidence so far suggests that kids are actually learning less under it Why then was such a costly and disruptive agenda imposed on the nation s schools Who benefits And how can citizens regain local self governance in education so their children s minds will be fed a more nourishing intellectual diet and be protected from the experiments of emboldened bureaucrats The Education Invasion offers answers and remedies      **Facing Forward** Sajitha Bashir,Marlaine Lockheed,Elizabeth Ninan,Jee-Peng Tan,2018-09-20 Facing Forward lays out a range of policy and implementation actions that are needed for countries in Sub Saharan Africa to meet the challenge of improving learning while expanding access and

completion of basic education for all The book underscores the importance of aligning the education system to be relentlessly focused on learning outcomes and to ensuring that all children have access to good schools good learning materials and good teachers It is unique in characterizing countries according to the challenges they faced in the 1990s and the educational progress they have made over the past 25 years allowing countries in the region to learn from each other The authors review the global literature and add to it by their extensive new analyses of multiple datasets from more than three dozen countries in the region they integrate findings about what affects children s learning their access to schooling and progress through basic education The book draws lessons from the region and for the region about what works and what is needed to better implement what is known to have worked The book examines four areas to help countries better align their systems to improve learning 1 completing the unfinished agenda of reaching universal basic education with quality 2 ensuring effective management and support of teachers 3 targeting spending priorities and budget processes on improving quality and 4 closing the institutional capacity gap It concludes with an assessment of how future educational progress may be affected by projected fertility rates and economic growth

**Early Language Learning in Context** David Hayes,2022-08-19 This book critically analyses early school foreign language teaching policy and practice foregrounding the influence of the socioeducational and cultural context on how policies are implemented and assessing the factors which either promote or constrain their effectiveness It focuses on four Asian contexts Malaysia South Korea Sri Lanka and Thailand while providing a discussion of policy and practice in Canada and Finland as a comparison Concentrating on the state school sector it criticises the worldwide trend for a focus on English as the principal or only foreign language taught in primary schools founded on a rationale that widespread proficiency in English is important for future national success in a globalised economy It maintains that the economic rationale is not only largely unfounded and irrelevant to the language learning experiences of young children but also that the focus on English exacerbates system inequalities rather than contributing to their reduction The book argues for a broader perspective on language learning in primary schools one that values multilingualism and knowledge of regional and indigenous languages alongside a more diverse range of foreign languages This book will appeal to educational policymakers researchers and students interested in early foreign language learning in state educational systems worldwide
