There's no doubt that chocolate is one of the world's most favourite foods. Chocolate comes from the beans of cocoa tree, a plant that has grown in America for 4000 years. However, it was not known in Europe until the Spanish explorers brought it to Spain in 1528.

There are many reasons why chocolate is so popular. People like its rich and delicious flavours. Some people think that chocolate is even better when combined with fruit and nuts.

Eating chocolate has mental benefits, too. Many people eat chocolate when they are stressed or upset. It is said that one ingredient of chocolate lowers stress.

**Oxford Companion to the English Language** Tom McArthur, Jacqueline Lam-McArthur, Lise Fontaine, 2018-05-14 The Oxford Companion to the English Language provides an authoritative single volume source of information about the English language. It is intended both for reference and for browsing. The first edition of this landmark Companion published in 1998 adopted a strong international perspective covering topics from Cockney to Creole, Aboriginal English to Caribbean English and a historical range from Chaucer to Chomsky, Latin to the World Wide Web. It succinctly described and discussed the English language at the end of the twentieth century including its distribution and varieties, its cultural, political and educational impact worldwide, its nature, origins and prospects, and its pronunciation, grammar, vocabulary, word formation and usage. This new edition notably focuses on World Englishes, English language teaching, English as an international language and the effect of technological advances on the English language. More than 130 new entries include African American English, British Sign Language, China English, digital literacy, multimodality, social networking, superdiversity and text messaging among many others. It also includes new biographical entries on key individuals who have had an impact on the English language in recent decades, including Beryl S. Atkins, Adam Kilgarriff and John Sinclair. It is an invaluable reference for English Language students and fascinating reading for any general reader with an interest in language.

**Matter, Affect, AntiNormativity** Caroline Braunmühl, 2022-03-07 Dualistic thinking has been questioned by some writers associated with the material, ontological and affective turns. Yet these and other writers linked to the turns have themselves reproduced dualistic theorizing. Caroline Braunmühl also shows that there are dualistic patterns in significant contributions to queer theory as well as Foucauldian diagnoses of the present. From a perspective sympathetic to the critical efforts made by poststructuralist and related theorists, she analyzes works by Sara Ahmed, Karen Barad, Michael Hardt, Antonio Negri, Michel Foucault and others. The book suggests specific alternatives to dualistic as well as identitarian ways of framing conceptual pairs such as matter/mind, affect/discourse and negativity/affirmation. *Word-Formation in English* Ingo Plag, 2018-07-12 The book enables students with little prior knowledge of linguistics to engage in their own analyses of complex words.

**English Language Teacher Preparation in Asia** Subhan Zein, Richmond Stroupe, 2018-08-06 Bringing together a comprehensive range of extended research-based chapters, *English Language Teacher Preparation in Asia* provides comprehensive insight into policy, research and practical aspects of teacher preparation for English teachers at pre-service level across multiple contexts in Asia. Written by local and international scholars specialising in TESOL, Teacher Education and acknowledging the increasingly complex demands made on teachers of English in view of globalisation, the book explores the multiple factors which are key to effective professional learning. Chapters consider how pre-service teachers are best prepared for the diverse contexts in which English is learnt and taught in settings throughout Asia and draw on in-depth research studies to provide rich, fully contextualised coverage of aspects of teacher preparation, including

curriculum design programme development policy professional learning communities assessment education and teaching practicum A timely contribution to the field of teacher preparation this text will be an invaluable resource for teacher educators pre service teachers and academics involved in the preparation of English teachers in Asia

**Studies in the History of the English Language VIII** Peter Grund, Megan Hartman, 2020-11-09 This volume collects essays that approach notions of creating maintaining and crossing boundaries in the history of the English language The concept of boundaries is variously defined within linguistics depending on the theoretical framework from formal and theoretical perspectives to specific fields and more empirical physical and perceptual angles The contributions to this volume do not take one particular theoretical or methodological approach but instead explore how examining various types of boundaries linguistic conceptual analytical generic physical helps us illuminate and account for historical use variation and change in English In their exploration of various topics in the history of English contributions ask a range of questions what does it mean to set up boundaries between time periods When do language varieties have distinct boundaries and when do they overlap Where do language users draw up clausal constructional semantic phonetic phonological boundaries Thus the chapters explore not only how boundaries illustrate synchronic and diachronic features in the history of the English language but also what we can discover by questioning perceived or actual boundaries

*Stress Variation in English* Alexander Tokar, 2017-11-13 This monograph is concerned with the question of why some English words have more than one stress pattern E g overt vs o vert pulsate vs pul sate etc It is argued that cases such as these are due to the fact that the morphological structure of one and the same English word can sometimes be analyzed in more than one way Thus overt is the stress pattern of the suffixation analysis over t whereas o vert is due to the prefixation analysis o vert cf covert Similarly pulsate is simultaneously pulse ate i e a suffixed derivative and a back derivative from pul sate Tokar s approach in the use of both dictionary OED and corpus data YouTube holds promise of a scholarly breakthrough on the vital linguistic prosodic topic of English stress assignment of doublets and of stress assignment in general Irmengard Rauch Professor of Germanic Linguistics at the University of California Berkeley

*The emergence of American English as a discursive variety* Ingrid Paulsen, 2022 Do speakers identity constructions influence the emergence of new varieties of a language This question is at the heart of a debate about how the process of the emergence of postcolonial varieties of English can best be modeled This volume contributes to the debate by linking it to models and theories proposed by anthropological linguists sociolinguists and discourse linguists who view identity as a social and cultural phenomenon that is produced through linguistic and other social practices Language is seen as essential for identity constructions because speakers use linguistic forms that index social personae as well as specific social practices and values to convey an image of self to other speakers Based on the theory of enregisterment that models the cultural and discursive process of the creation of indexical links between linguistic forms and social values the argument is made that any model of the emergence of new varieties needs to differentiate carefully between a structural level and a

discursive level What emerges on the discursive level as a result of processes of enregisterment is a discursive variety The volume illustrates how the emergence of a discursive variety can be systematically studied in a historical context by focusing on the enregisterment of American English as it can be observed in nineteenth century U S newspapers Using a discourse linguistic methodological framework and two large databases containing close to 78 million newspaper articles the study reveals a complex pattern of indexical links between the phonological forms h dropping and insertion yod dropping a lengthened and backened bath vowel non rhoticity a realization of prevocalic r as a labiodental approximant as well as the lexical items baggage and pants on the one hand and social values centering around nationality authenticity and non specificity on the other hand Qualitative analyses uncover the social personae associated with the linguistic forms e g the American cowboy the African American mammy and the Anglo maniac American dude while quantitative analyses trace the development over time and show that the enregisterment processes were widespread and not restricted to a particular region
