The Peril of Log Building Rob Pickett, 2012-10-23 Many excellent books and articles have been published about log homes. Some focus on the aesthetics style and decorating of log homes. Some focus on building methods from build your own to technical instructions. None examine the specific evaluation of log structures to build a high performance structure. This book is intended to provide industry specific information that can serve as a solid reference for technical discussion. It can benefit presentations to code administrators or legislators to help folks understand the benefits of log building. It is intended to bolster adoption of ICC400 as the Log Building Code worldwide. The Peril of Log Building documents the course of action that has stymied the log home industry. It is a search for the answer that supports and explains the thermal performance of log walls. It provides a discussion of the elements of log home design and construction as established by ICC400 and why those elements are important. It includes worksheets as examples of those methods of evaluation.

7001 Resumes-Plus Second Edition Ferris E. Merhish, 2010 In this second chronicle about Deborah she faces an enemy whose sole purpose is to kill every human being in the universe The location of the enemy s home planets is unknown This enemy has unlimited ships and no concern about the high losses to their personnel The initial evaluation is that the enemy may not even be human They are given the name Grays A creature like the Grays seems rather harmless compared to what fiction shows you The Grays went unchallenged only because they looked so weak and fragile No one saw them as a

serious threat I can only think of the army ants on the march No one takes an ant seriously however an army of ants will devastate an area and kill every living creature The Grays are the same type of threat to mankind As the Grays are building up their fleets and personnel Deborah desperately searches the known universe for additional personnel in this search she even goes to primitive nations The United States strips its military forces to provide as many personnel as possible Despite this effort there are still not enough personnel Deborah s scientists are working around the clock to not only upgrade her weapons but also provide her with new types of weapons Ramah and the United States are making a maximum effort to prepare for the upcoming battle with the Grays In this battle either the humans or the Grays will become extinct
