

Executive Summary

Results from two studies are summarized in this Executive Summary. The first section of this document provides an overview of the results of an evaluation of the procedures and processes implemented to establish performance standards for the Indiana Standards Tool for Alternate Reporting (ISTAR) in the subject areas of English/Language Arts (ELA) and mathematics for grades 3-8 and 10; science for grades 4, 6, and 10; and social studies for grades 5 and 7. The second section of this document provides an overview of the results of an evaluation of the procedures and processes implemented for the validation of the performance standards for all ELA assessments. The validation process was conducted post standard setting to address an error in computation of the impact data that was shared with panelists during original standard setting meeting.

Standard Setting Study

The Item-Descriptor (ID) matching procedure was used to establish recommended performance standards for each ISTAR assessment. All activities during the standard setting meetings were organized and implemented by Questar Assessment, Inc. (Questar). Panelists were recruited by the Indiana Department of Education. Evidence presented in this report is based on a 3rd party, independent evaluator's review of materials, on-site observations, and evaluation of information collected from panelists.

The design of the ID matching procedure was implemented across three days (two days for grade 10) and called for an iterative process to include four rounds of judgments and result in two recommended cut scores for each ISTAR test—a Meeting Proficiency cut score and an Exceeding Proficiency cut score. The process was designed to include the following components:

- **General Session.** This initial session includes all panelists for a meeting and provides an overview of ISTAR, an introduction to the standard setting process, and a review of logistics such as security procedures and nondisclosure agreements. Panelists then break into grade-band panels and implement the remaining components for each grade-level assessment for which they are recommending performance standards.
- **Experience the assessment.** Panelists on a grade-band panel can gain insight and understanding of an assessment by taking a form of the assessment under conditions like those experienced by students.
- **PLD review and discussion.** Panelists independently review and then discuss the performance level descriptors (PLDs) associated with an ISTAR assessment.
- **OIB review and discussion.** Panelists review and discuss each item in an ordered item booklet (OIB), noting the knowledge, skills, and cognitive processes required to answer an item correctly or achieve a score point on a polytomous item, and discussing why an item was more difficult for students than the previous items.
- **ID Matching practice round.** For the upper grade level assessment addressed by a grade-band panel, panelists practice the task of matching items to PLDs using a small sample of items arranged in an OIB.
