Directions: Complete each activity, then submit answers to questions.

Open Knowledge Questbook (Tap Screen) (100%) using the Gizmo.

Let's start with some questions about falling objects. We're going to use the Gizmo to explore how things fall. In the Gizmo, we can see three objects falling from the top of a building. The objects are a feather, a ball, and a brick. The brick is the heaviest, the ball is in the middle, and the feather is the lightest. We can see that the brick falls the fastest, the ball falls in the middle, and the feather falls the slowest. This is because of gravity. Gravity is a force that pulls objects down towards the ground. The heavier an object is, the more gravity pulls on it, so it falls faster.

- For each picture, draw a right triangle showing the path of the object. Label the three important points: "Start", "Middle", and "End".

- What would happen if the objects were not falling straight down?

Answer: If the objects were not falling straight down, they would follow a curved path.
