*Creative Research in Economics* Arnold Wentzel, 2016-09-13 Researchers are expected to produce original findings yet nobody explains how original contributions are conceived in economics Recently

there have been calls for more creativity in economic research yet there is no literature that explores creative research apart from collections of biographical essays This book aims to address that gap exploring the process of conceiving and generating ideas for interesting and original research contributions in economics and potentially other social sciences too Creative Research in Economics serves both a practical and theoretical purpose Theoretically it presents a unique way of thinking about the nature of problems and questions in economics and the role of social science researchers in society As such it offers an interesting way to think about the philosophy of science and methodology in economics and how new ideas emerge in the discipline Practically it develops techniques for finding interesting and original research contributions as opposed to conventional data gathering research Whether you are a graduate student looking for that first interesting question a novice researcher in search of fresh avenues for research after your PhD or a seasoned academic looking to teach the philosophy and methodology of economics in more interesting ways you will find this book of great use **Changing**

**Conceptions, Changing Practices** Angela Glotfelter, Caitlin Martin, Mandy Olejnik, Ann Updike, Elizabeth Wardle, 2022-12-28 Changing Conceptions Changing Practices demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability Relating the experiences of faculty from disciplines as diverse as art history economics psychology and philosophy this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action The authors draw on the threshold concepts framework research in writing studies and theories of learning leadership and change to deftly explore why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional development for faculty teams can help make such change possible This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected In today's climate courses programs and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning with grave consequences for students The stakes have never been higher particularly for public higher education Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students Professional developers have an important role to play in such change efforts WAC scholars and practitioners leaders of professional development and centers for teaching excellence program administrators and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in Changing Conceptions Changing Practices Contributors Juan Carlos Albarr n Jos Amador Annie Dell Aria Kate de Medeiros Keith Fennen Jordan A Fenton Carrie E Hall Elena Jackson Albarr n Erik N Jensen Vrinda Kalia Janice Kinghorn Jennifer Kinney Sheri Leafgren Elaine Maimon Elaine Miller Gaile Pohlhaus Jr Jennifer J Quinn Barbara J Rose Scott Sander Brian D Schultz Ling Shao L James Smart Pepper Stetler *An Introduction to Statistics and Data Analysis Using Stata®* Lisa

Daniels, Nicholas Minot, 2025-01-10 *An Introduction to Statistics and Data Analysis Using Stata From Research Design to Final Report Second Edition* provides an integrated approach to research methods statistics and data analysis and interpretation of results in Stata Drawing on their combined 25 years of experience teaching statistics and research methods authors Lisa Daniels and Nicholas Minot frame data analysis within the research process identifying gaps in the literature examining the theory developing research questions designing a questionnaire or using secondary data analyzing the data and writing a research paper so readers better understand the context of data analysis Throughout the text focuses on documenting and communicating results so students can produce a finished report or article by the end of their courses The Second Edition has been thoroughly updated with all new articles and data including coverage of ChatGPT COVID 19 policies and SAT scores to demonstrate the relevance of data analysis for students A new chapter on advanced methods in regression analysis allows instructors to better feature these important techniques Stata code has been updated to the latest version and new exercises throughout offer more chances for practice
