*Groundwater Resources Modelling* M. G. Shepley, 2012 The UK is a country with over 150 years of widespread exploitation of its principal aquifers for public water supply Increasing demands greater awareness of environmental pressures and more exacting legislation has heightened the need for quantitative models to predict the impacts of groundwater use In the UK this has culminated in a unique national regulator led programme for England and Wales to develop conceptual and numerical models of the principal bedrock aquifers The outcomes of this programme will be of interest to the international hydrogeological community particularly as international legislation such as the European Water Framework Directive requires management of water issues across administrative boundaries with a varied cast of stakeholders The collection of papers provides a contrast between practitioner and research based approaches to assess and predict the anthropogenic impacts and environmental pressures **Resources in Education** ,1997 *Sur/View* ,1991
