The Past and Future of Ireland, Indicated by Its Educational History: Comprising a Vindication of the National System and the Queen's Colleges Ireland. [Appendix. - Education.], 1850

**Dreams of the Future in Nineteenth-Century Ireland** Richard J. Butler, 2021-09-01 This interdisciplinary collection focuses on the history of the future and in particular how Irish people in the nineteenth century thought about their future in many different ways and contexts It spans the long nineteenth century from c 1800 to c 1914 and includes both people living on the island of Ireland and the Irish abroad women and men the religious and the secular the governing and the governed It explores both individually and collectively the various hopes dreams fears and visions of the future that permeated through nineteenth century Ireland and Irish life The collection also analyses how the Irish future

was conceptualized and understood in different cultural contexts how visions of the future shifted in relation to the present and the past and how the future was instrumentalized for political religious or other social agendas It attempts to go beyond the usual political or religious discourses on what the future might hold for Irish people and consider a broader spectrum of witnesses from a mixture of historical and literary sources CONTRIBUTORS Patrick Bethel Richard J Butler Pauline Collombier Lakeman Sophie Cooper Catherine Healy Peter Hession Rapha l Ingelbien Jim Kelly Fiona Lyons Aoife O Leary McNeice Patrick Maume Christopher P Morash Loughlin J Sweeney Scotland's Future History Stuart McHardy,2015-04-06 McHardy presents a new approach to history changing our mindset to look at Scotland as the centre of our story Rather than starting from the Mediterranean from the classical Christian bias we have been taught for centuries Rather than being a remote dark land populated by barbaric tribes Perhaps we were the centre of a well organised civilisation around the Orkneys and islands and coasts and rivers with our own priorities community centred locally self sufficient well versed in lore of all kinds Who were are we The great centres of ritual in Orkney Lewis and Kilmartin suggest an indigenous population much more sophisticated in terms of social ritual and communal rule than we have been led to believe In whose interest is it that we accept the classical Christian version of history relayed to us by monks These are some of the questions McHardy addresses in a passionate and accessible style Read and become more Alba centric in terms of what we see as important to research study and understand *The past and future of Ireland, indicated by its educational history* Richard Whately,1850 **The Politics and Polemics of Culture in Ireland, 1800-2010** Pat Cooke,2021-09-30 As a contribution to cultural policy studies this book offers a uniquely detailed and comprehensive account of the historical evolution of cultural policies and their contestation within a single democratic polity while treating these developments comparatively against the backdrop of contemporaneous influences and developments internationally It traces the climate of debate policies and institutional arrangements arising from the state s regulation and administration of culture in Ireland from 1800 to 2010 It traces the influence of precedent and practice developed under British rule in the nineteenth century on government in the 26 county Free State established in 1922 subsequently declared the Republic of Ireland in 1949 It demonstrates the enduring influence of the liberal principle of minimal intervention in cultural life on the approach of successive Irish governments to the formulation of cultural policy right up to the 1970s From 1973 onwards however the state began to take a more interventionist and welfarist approach to culture This was marked by increasing professionalization of the arts and heritage and a decline in state support for amateur and voluntary cultural bodies That the state had a more expansive role to play in regulating and funding culture became a norm of cultural discourse **A History of Irish Modernism** Gregory Castle,Patrick Bixby,2019-01-24 A History of Irish Modernism examines a wide variety of artworks from the 1890s to the 1970s including examples from literature film painting music radio and architecture Each chapter considers a particular aspect of Irish culture and reflects on its contribution to modernism at large In addition to new

research on the Irish Revival and cultural nationalism which places them squarely in the modernist arena chapters offer transnational and transdisciplinary perspectives that place Irish cultural production in new contexts At the same time the historical standpoint adopted in each chapter enables the contributors to examine how modernist practices developed across geographical and temporal distances A History of Irish Modernism thus attests to the unique development of modernism in Ireland driven by political as well as artistic concerns even as it embodies aesthetic principles that are the hallmark of modernism in Europe the Americas and beyond

The Future of Economic History Alexander J. Field, 2012-12-06 This collection represents a modest attempt to chart a new course for the intellectual discipline known as economic history The book is not about productivity growth in the 1990s lest the title give rise to any confusion As a group these essays suggest new and potentially fruitful areas or approaches for research and at the same time address weaknesses in past efforts One important audience will be graduate students attempting to decide whether to write a dissertation in economic history or trying to select or refine dissertation topics in the area and determine how to approach them Some of the essays will most certainly be appropriate additions to the or semester courses in economic history that remain a fixture in quarter graduate economics training programs A second audience should be established scholars who are now or have in the past done research in economic history and are interested in the perspectives of a relatively younger group of scholars The term younger is used here advisedly to describe a group of scholars born between 1943 and 1954 Nevertheless the authors of these essays can on at least one dimension be distinguished from the pathbreaking new economic historians who established their academic reputations in the early 1960s Indeed the contributors to this volume include students of such pioneers as Richard Easterlin Albert Fishlow William Parker and Jeffrey Williamson
