**The American Museum of Natural History and How It Got That Way** Colin Davey, Thomas A. Lesser, 2019-05-14 An extensive history of the American Museum of Natural History and Hayden Planetarium featuring a cast of colorful characters. The American Museum of Natural History is one of New York City's most beloved institutions and one of the largest, most celebrated museums in the world. Since 1869, generations of New Yorkers and tourists of all ages have been educated and entertained here. Located across from Central Park, the sprawling structure spanning four city blocks is a fascinating conglomeration of many buildings of diverse architectural styles built over a period of 150 years. The first book to tell the history of the museum from the point of view of these buildings, including the planned Gilder Center, *The American Museum of Natural History and How It Got That Way* contextualizes them within New York and American history and the history of science. Part II, *The Heavens in the Attic*, is the first detailed history of the Hayden Planetarium from the museum's earliest astronomy exhibits to Clyde Fisher and the

original planetarium to Neil deGrasse Tyson and the Rose Center for Earth and Space and it features a photographic tour through the original Hayden Planetarium Author Colin Davey spent much of his childhood literally and figuratively lost in the museum s labyrinthine hallways The museum grew in fits and starts according to the vicissitudes of backroom deals personal agendas two world wars the Great Depression and the Cold War Chronicling its evolution from the selection of a desolate rocky hilly swampy site known as Manhattan Square to the present day the book includes some of the most important and colorful characters in the city s history including the notoriously corrupt and powerful Boss Tweed Father of New York City Andrew Haswell Green and twentieth century powerbroker and master builder Robert Moses museum presidents Morris K Jesup Henry Fairfield Osborn and Ellen Futter and American presidents polar and African explorers dinosaur hunters and German rocket scientists Features a new preface by the author and a new foreword by Neil deGrasse Tyson This is in many ways a particularly American story and anyone interested in history or museums will find this a very satisfying read Author Colin Davey had a life long love affair with the museum growing up in New York and spending many many hours happily lost in the museum collections and that shines through in his writing as does his fine in depth research Plenty of excellent graphics and photographs support this fascinating history Seattle Book Review     The Illustrative Lesson Notes ,1890

unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future      *Notes and Queries: A Medium of Inter-Communication for Literary Men, Artists, Antiquaries, Genealogists, Etc* , 1866
