Undermining Racial Justice Matthew Johnson,2020-04-15 Over the last sixty years administrators on college campuses nationwide have responded to black campus activists by making racial inclusion and inequality compatible This bold argument is at the center of Matthew Johnson s powerful and controversial book Focusing on the University of Michigan often a key talking point in national debates about racial justice thanks to the contentious Gratz v Bollinger 2003 Supreme Court case Johnson argues that UM leaders incorporated black student dissent selectively into the institution s policies practices and values This strategy was used to prevent activism from disrupting the institutional priorities that campus leaders deemed more important than racial justice Despite knowing that racial disparities would likely continue Johnson demonstrates that these administrators improbably saw themselves as champions of racial equity What Johnson contends in *Undermining Racial Justice* is not that good intentions resulted in unforeseen negative consequences but that the people who created and maintained racial inequities at premier institutions of higher education across the United States firmly believed they had good intentions in spite of all the evidence to the contrary The case of the University of Michigan fits into a broader pattern at elite colleges and universities and is a cautionary tale for all in higher education As Matthew Johnson illustrates inclusion has always been a secondary priority and as a result the policies of the late 1970s and 1980s ushered in a new and enduring era of racial retrenchment on campuses nationwide

the changing nature and legacies of America's oldest public schools Ohio Practical Farmer ,1877 **Debating Modern Medical Technologies** Karen J. Maschke, Michael K. Gusmano, 2018-09-14 This book analyzes policy fights about what counts as good evidence of safety and effectiveness when it comes to new health care technologies in the United States and what political decisions mean for patients and doctors. Medical technologies often promise to extend and improve quality of life but come with many questions: Are they safe and effective? Are they worth the cost? When should they be allowed on the market and when should Medicare, Medicaid, and private insurance companies be required to pay for drugs, devices, and diagnostic tests? Using case studies of disputes about the value of mammography screening, genetic testing for disease risk, brain imaging technologies to detect biomarkers associated with Alzheimer's disease, cell-based therapies, and new expensive drugs, Maschke and Gusmano illustrate how scientific disagreements about what counts as good evidence of safety and effectiveness are often swept up in partisan fights over health care reform and battles among insurance and health care companies, physicians, and patient advocates. **Debating Modern Medical Technologies: The Politics of Safety, Effectiveness, and Patient Access** reveals stakeholders differing values and interests regarding patient choice, physician autonomy, risk assessment, government intervention in medicine, and technology assessment and scientific innovation as a driver of national and global economies. It will help readers to understand the nature and complexity of past and current policy disagreements and their effects on patients. **The Cumulative Book Index** ,1933
