A World History of War Crimes Michael S. Bryant, 2021-01-28 The greatly expanded and enhanced 2nd edition of A World History of War Crimes provides an authoritative and accessible introduction to the global history of war crimes and the laws of war Tracing human efforts to limit warfare from codes of war in antiquity designed to maintain a religiously conceived cosmic order to the gradual use in the modern age of the criminal trial as a means of enforcing universal humanitarian norms Michael S Bryant's book is a masterful one volume account of the subject This new edition includes for the first time Two chapters providing extensive coverage of the Americas Africa and the Middle East Strengthened chronological boundaries a new chapter on the Incas Aztecs Mayan and North American Indian tribes as well as more material across all regions in ancient times discussion of contemporary war crimes committed in Afghanistan Iraq Myanmar and Syria A historiographical essay to broaden your understanding of the field An added final chapter focusing on the social cultural and psychological aspects of the subject A World History of War Crimes is vital reading for anyone needing to understand the history of war in one of its most significant contexts **Richard M. Nixon and European Integration**

Joseph M. Siracusa, Hang Thi Thuy Nguyen, 2018-04-13 This book re-examines the Nixon administration's attitude and approach to the European integration project The formulation of US policy towards European integration in the Nixon presidential years 1969-1974 was conditioned by the perceived relative decline of the United States Western European emergence and competition the feared Communist expansionism and US national interests Against that backdrop the Nixon administration saw the need to re-evaluate its policy on Western Europe and the integration process on this continent Underpinning this study is the extensive use of newly released archival materials from the Nixon Presidential Library and Museum the Library of Congress and the State Department Furthermore the work is based on the public papers in the American Presidency Project and the materials on the topic of European integration and unification in the Archive of European Integration Finally the study has extensively used newspaper archives as well as the declassified online documents memoirs and diaries of former US officials Mining these sources made it possible to shed new light on the complexity and dynamism of the Nixon administration's policy towards European integration **The Code** Margaret O'Mara, 2020-07-07

One of New York Magazine's best books on Silicon Valley The true behind the scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O'Mara became one of our most consequential historians of the American led digital revolution she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet There she saw firsthand how deeply intertwined Silicon Valley was with the federal government and always had been and how shallow the common understanding of the secrets of the Valley's success actually was Now after almost five years of pioneering research O'Mara has produced the definitive history of Silicon Valley for our time the story of mavericks and visionaries but also of powerful institutions creating the framework for innovation from the Pentagon to

Stanford University It is also a story of a community that started off remarkably homogeneous and tight knit and stayed that way and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second order effects Deploying a wonderfully rich and diverse cast of protagonists from the justly famous to the unjustly obscure across four generations of explosive growth in the Valley from the forties to the present O Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form She is on the ground with all of the key tech companies chronicling the evolution in their offerings through each successive era and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years Perhaps most impressive O Mara has penetrated the inner kingdom of tech venture capital firms the insular and still remarkably old boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market or not The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams and increasingly our nightmares can be understood in Margaret O Mara's masterful hands as the story of one California valley As her majestic history makes clear its fate is the fate of us all *The American War in Afghanistan* Carter Malkasian, 2021 A history of the war in Afghanistan between 2001 and 2020 The work follows a narrative format to go through the 2001 US invasion the state building of 2002 2005 the Taliban offensive of 2006 the US surge of 2009 2011 the subsequent drawdown and the peace talks of 2019 2020 *Crimea, Global Rivalry, and the Vengeance of History* Hall Gardner, 2016-04-30 Gardner examines the causes and consequences of Russia's annexation of Crimea By analyzing alliance formations and the consequences of other annexations in world history the book urges an alternative US NATO European Japanese strategy toward both Russia and China in the effort to prevent a renewed arms race if not global war **Eisenhower at the Dawn of the Space Age** Mark Shanahan, 2016-11-14 Historians have established a norm whereby President Eisenhower's actions in relation to the dawn of the space age are judged solely as a response to the Soviet launch of the Sputnik satellite and are indicative of a passive negative presidency His low key actions are seen merely as a prelude to the US triumph in space which is largely bookended first by President Kennedy's man to the moon pledge in 1961 and finally by Neil Armstrong's moon landing eight years later This book presents an alternative view of the development of space policy during Eisenhower's administration assessing the hypothesis that his space policy was not a reaction to the heavily propagandized Soviet satellite launches or even the effect they caused in the US political and military elites but the continuation of a strategic journey This study engages with three distinct but converging strands of literature and proposes a revised interpretation of Eisenhower's actions in relation to rockets missiles and satellites namely that Eisenhower was operating on a parallel path to the established norm that started with the Bikini Atoll Castle H bomb tests developed through the CIA's reconnaissance efforts and was distilled in the Aeronautics and Space Act of 1958 which set a policy for US involvement in outer space that matched Eisenhower's desire for a balanced budget and fundamental belief in

maintaining peace President Eisenhower was not interested in joining a space race while national security underpinned his thinking his space policy actions were strategic steps that actively sidestepped internecine armed forces rivalry and provided a logical next step for both civilian and military space programs at the completion of the International Geophysical Year In reassessing the United States first space policy the book adds to the revisionism under way in relation to the Eisenhower presidency focusing on the Helping Hands that enabled him to wage peace

A History of British National Audit David Dewar, Warwick Funnell, 2017 This book provides a detailed history of the struggle by Parliament and the British public to make the Executive accountable for the use of public funds from early historical developments through to modern principles and practice

Who Owns History? Geoffrey Robertson, 2019-11-05 The biggest question in the world of art and culture concerns the return of property taken without consent Throughout history conquerors or colonial masters have taken artefacts from subjugated peoples who now want them returned from museums and private collections in Europe and the USA The controversy rages on over the Elgin Marbles and has been given immediacy by figures such as France's President Macron who says he will order French museums to return hundreds of artworks acquired by force or fraud in Africa and by British opposition leader Jeremy Corbyn who has pledged that a Labour government would return the Elgin Marbles to Greece Elsewhere there is a debate in Belgium about whether the Africa Museum newly opened with 120 000 items acquired mainly by armed forces in the Congo should close Although there is an international convention dated 1970 that deals with the restoration of artefacts stolen since that time there is no agreement on the rules of law or ethics which should govern the fate of objects forcefully or lawlessly acquired in previous centuries Who Owns History delves into the crucial debate over the Elgin Marbles but also offers a system for the return of cultural property based on human rights law principles that are being developed by the courts It is not a legal text but rather an examination of how the past can be experienced by everyone as well as by the people of the country of origin
