Supply side federalism and globalization the Howard years 1996 2007 National control and the Rudd Gillard Abbott Turnbull and Morrison years 2007 15 A thorough and significant examination of the historical engagement of the Australian government in education this book is essential reading for student teachers and postgraduate students in education studies and politics *Portugal's Global Cinema* Mariana Liz, 2017-11-30 Portuguese cinema has become increasingly prominent on the international film festival circuit proving the country's size belies its cultural impact From the prestige of directors Manoel de Oliveira Pedro Costa and Miguel Gomes to box office hit *La Cage Doree* aspects of Portuguese national cinema are widely visible although the output is comparatively small compared to European players like the UK Germany and France Considering this strange discrepancy prompts the question how can Portuguese cinema be characterised and thought about in a global context Accumulating expertise from an international group of scholars this book investigates the shifting significance of the nation Europe and the globe for the way in which Portuguese film is managed on the international stage Chapters argue that film industry professionals and artisans must navigate complex globalised systems that inform their filmmaking decisions Expectations from multi cultural audiences as well as demands from business investors and the criteria for critical accolades put pressure on Portuguese cinema to negotiate for example how far to retain national identities on screen and how to interact with popular and art film tropes and labels Exploring themes typical of Portuguese visual culture including social exclusion and unemployment issues of realism and authenticity and addressing Portugal's postcolonial status this book is a valuable study of interest to the ever growing number of scholars looking outside the usual canons of European cinema and those researching the ongoing implications of national cinema's global networks Planning After Petroleum Jago Dodson, Neil Sipe, Anitra Nelson, 2016-10-04 The past decade has been one of the most volatile periods in global petroleum markets in living memory and future oil supply security and price levels remain highly uncertain This poses many questions for the professional activities of planners and urbanists because contemporary cities are highly dependent on petroleum as a transport fuel How will oil dependent cities respond and adapt to the changing pattern of petroleum supplies What key strategies should planners and policy makers implement in petroleum vulnerable cities to address the challenges of moving beyond oil How might a shift away from petroleum provide opportunities to improve or remake cities for the economic social and environmental imperatives of twenty first century sustainability Such questions are the focus of contributors to this book with perspectives ranging across the planning challenge overarching petroleum futures governance transition and climate change questions the role of various urban transport nodes and household responses ways of measuring oil vulnerability and the effects on telecommunications ports and other urban infrastructure This comprehensive volume with contributions from and focusing on cities in Australia the UK the US France Germany the Netherlands and South Korea provides key insights to enable cities to plan for the age beyond petroleum Contemporary Issues in Heterodox Economics Arturo Hermann, Simon Mouatt, 2020-10-07 Heterodox economics can provide a more complete and robust

explanation of economic realities than orthodox or mainstream economics Contemporary Issues in Heterodox Economics Implications for Theory and Policy Action argues that this greater explanatory power gives heterodox economics the ability to illuminate appropriate policy for the major crises of our time as well as proffer the basis for a more rounded pluralist approach to economic theory The chapters in this wide ranging volume address some of the key issues facing the global economy including the growing disparity of income wealth between persons and economic areas environmental degradation issues associated with employment and the regularity of economic financial crises The authors examine potential policy responses such as modern monetary theory models of public ownership and the need to move beyond standard concepts of growth They also explore the deficiencies of orthodox economics and contend that a more pluralist approach to economics is required in the public sphere in academia and in the classroom in order to help face the challenges of the twenty first century This book is invaluable reading for students and scholars across the social sciences who are interested in alternatives to mainstream economic thinking
