
"The implementation of Moa Zedong's policies like the Great Leap Forward and the Cultural Revolution was a dismal failure."

Do you agree with this statement? Use relevant evidence from 1958 to 1969 to support your line of argument.

One would fully agree that Moa Zedong's policies' such as the Great Leap Forward in 1958 and the Cultural Revolution in mid 1966 were both complete failures. They added nothing to the value of China but rather threw the country into a state of famine, chaos, and propaganda, and were rather used as a tool for Moa Zedong to regain his political control rather than to uplift China.

Moa Zedong first brought about the official start of communism with his 3 Five-Year Plans starting in 1953. His goal was to turn China into a "strong, modern industrial communist state." His second plan however was known as the "Great Leap Forward" which was enforced in 1958-1962. It is said to be the "Maoist response to the consequences of early industrialization". The idea behind this was that China could achieve a leap forward with technology and production without having to go through an Industrial Revolution, and rather use individual manpower instead of capital equipment to increase economic production.

One small-scale industrial development that was used during the Great Leap forward was the "backyard steel furnaces" that peasants were urged to make to create a rapid industrialization. Fifty million people were in iron and steel production in over 600,000 backyard steel furnaces, all of which was a complete disaster. Huge pressure was put on peasants to meet these steel quotas as punishments, such as death, were implemented. Thus many peasants melted down any available scrap metal, including farming equipment. The steel created was often unusable due to the poor quality of the raw materials used. On top of this, the destruction of steel every day and farming tools had decreased the quality of living as well as the degrading the ability to effectively mine and farm. The peasants had also abandoned their crops in order to focus their attention and resources on these furnaces, and China's crops were left to rot. Added to this, the deforestation of trees for coal for furnaces left the soil more susceptible to droughts and floods, which also devastated food and income sources. This brought about food shortages with strict rationing and ultimately brought a famine where 30 million peasants died of starvation and other related diseases.
