History of Technology Volume 30 Ian Inkster, Angel Calvo, 2016-03-31 This book focuses on the development of four key issues in the development of modern Spain knowledge manufacturing energy and telecommunications and public works If technology transfer from advanced nations to less developed systems always worked then the whole world would now be rich That this is not the case is so obvious we might well expect that the history of the processes successes and failures of technology transfer across nations would be a very well established field of enquiry In fact the theme is still a developing one and the present Special Issue centres on the case of Spain as exemplary in many respects The collected essays focus upon the four major themes of knowledge manufacturing energy and telecommunications and public works Essays range in time from the 18th century to the present time from studies of espionage and early links between craftsmen and savants to the institutions of technology from training systems to private enterprise activity or patents to case studies of silk manufacture shipbuilding mining paper making and pharmaceuticals Each essay offers a broad variety of material to bring to bear on a major problem of world development past present and future **History of Technology Volume 31** Ian Inkster, 2012-12-05

New work on early modern Europe has now opened up the hidden avenues that link changes of technologies with a complex of cognitive institutional spatial and cultural elements It is true that all divisions of history wish to incorporate all other divisions unto themselves but in the essays of our first collection there are specific cases and analyses clearly delineated to show how technologies and systems for the production reproduction and representation of technological changes emerged out of fundamental aspects of European society and mentality The question must be How far were such fundamental aspects unique in their entirety and configuration to Europe The second collection on patent agency takes the modern industrialization of Europe as its focus and illustrates the manner in which systems of intellectual property rights generated manifold agencies that acted to both spread and control the use of knowledge in advanced sites Patent agency has been generally neglected by historians one reason for this being the difficulty of defining effective agency beyond the obvious confines of those who were actually trained and remunerated as agents of invention Informal networks or sites may have been crucial in converting general patent systems into local environs of technical advance **History of Technology**

Volume 28 Ian Inkster, 2016-09-30 Technical standards have received increasing attention in recent years from historians of

science and technology management theorists and economists Often inquiry focuses on the emergence of stability technical closure and culturally uniform modernity Yet current literature also emphasizes the durability of localism heterogeneity and user choice This collection investigates the apparent tension between these trends using case studies from across the nineteenth and twentieth centuries The History of Technology addresses tensions between material standards and process standards explores the distinction between specifying standards and achieving convergence towards them and examines some of the discontents generated by the reach of standards into everyday life Includes the Special Issue By whose standards Standardization stability and uniformity in the history of information and electrical technologies **History of Technology, Volume 27, 2006** Ian Inkster, 2007-06-26 Deals with the history of technical discovery and change and explores the relationship of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred **Spacecraft Technology** Mark Williamson, 2006-02-23 This book covers the development of space technology in the late 1950s and 1960s from the launch of Sputnik 1 in October 1957 to the landing of men on the moon in 1969 The text begins by looking at the challenge of getting into space and the development of the launch of the space launch vehicle and moves on to discussion of unmanned satellites and space probes and the first capsules deployed in Earth orbit and the Apollo missions to the moon **History of Technology Volume 17** Graham Hollister-Short, Frank James, 2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays Volumes contain technical articles ranging widely in subject time and region as well as general papers on the history of technology In addition to dealing with the history of technical discovery and change History of Technology also explores the relations of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred
