History P1 Exemplar 2013:

Evidence and Method Peter Achinstein, 2013-03-04 What is meant by scientific evidence and how can a definition of this concept be applied in the sciences to determine whether observed facts constitute evidence that a given theory is true In this book Peter Achinstein proposes and defends several objective concepts of evidence He then explores the question of whether a scientific method such as that represented in the four Rules for the Study of Natural Philosophy that Isaac Newton invoked in proving his law of gravity can be employed in demonstrating how the proposed definitions of evidence are to be applied to real scientific cases In answering this question he offers a new interpretation of Newton's controversial rules Contrary to what many methodologists assume whether the rules so interpreted can be used to determine whether observed phenomena provide evidence for a theory is an empirical question not an a priori one Finally in order to deal with numerous cases in which evidence is insufficient to establish a theory or where no theory is even available Achinstein describes and defends three scientific methods proposed by the 19th century theoretical physicist James Clerk Maxwell in the course of developing his electrical and molecular theories

The Eight Per Cent Solution Nikhil Gupta, 2023-08-26 IT IS A WONDERFUL STORY but time after time in the decades since Independence it stops short midway India is poised for growth The GDP is rising The lumbering elephant is turning into a tiger But the leap doesn't quite happen There has been enormous change but alongside the problems have also been rising And for a large mass of people it remains a future of brutal poverty If India is to meet the needs of its people it has to consistently generate enough jobs for the millions of youth who enter the job market every year and build up an infrastructure in which there is enough to go round for education health and security of its population Nikhil Gupta chief economist with a leading brokerage has been a close observer of the policies and factors that help India grow As he puts it an economy consists of four participants households corporate government and external and just three activities consumption savings investment and external trade However the lack of attention to the finances of the household sector and the unlisted corporate sector is shocking As too the gap between the real and the financial economy It is these and other gaps in this complicated scenario that Gupta tries to bridge The Eight per cent Solution presents Gupta's version of a grand unified theory that brings in the neglected but important elements to show how India can finally achieve that elusive target of a higher phase of growth

Soar: A Cognitive Architecture in Perspective J.A. Michon,Aladin Akyrürek,2013-03-12 *Soar A Cognitive Architecture in Perspective* represents a European perspective on Soar with the exception of the special contribution from Allen Newell arguing for Unified Theories of Cognition The various papers derive from the work of the Soar Research Group that has been active at the University of Groningen The Netherlands since 1987 The work reported here has been inspired in particular by two topics that precipitated the group s interest in Soar in the first place road user behavior and the temporal organization of behavior more specifically planning At the same time the various contributions go well beyond the simple use of Soar as a convenient medium for modeling human cognitive activity In every paper one or more fundamental issues are raised that touch upon the very nature and consistency of Soar as an intelligent architecture As a result the reader will learn about the operator implementation problem chunking multitasking the need to constrain the depth of the goal stack and induction etc Soar is still at a relatively early stage of development It does nevertheless constitute an important breakthrough in the area of computer architectures for general intelligence Soar shows one important direction that future efforts to build intelligent systems should take if they aim for a comprehensive and psychologically meaningful theory of cognition This is argued in a powerful way by Newell in his contribution to this volume For this reason the Soar system will probably play an important integrative role within cognitive science in bringing together important subdomains of psychology computer science linguistics and the neurosciences Although Soar is not the only architecture for intelligence it is one of the most advanced and theoretically best motivated architectures presently available *Soar A Cognitive Architecture in Perspective* is of special interest to researchers in the domains of cognitive science computer science and artificial intelligence cognitive psychology and the philosophy of mind

Ancient Gospel or Modern Forgery? Tony Burke,2013-01-07 In 1958 American historian of religion Morton Smith made an astounding discovery in the

Mar Saba monastery in Jerusalem Copied into the back of a seventeenth century book was a lost letter attributed to Clement of Alexandria ca 150 215 CE that contained excerpts from a longer version of the Gospel of Mark written by Mark himself and circulating in Alexandria Egypt More than fifty years after its discovery the origins of this Secret Gospel of Mark remain contentious Some consider it an authentic witness to an early form of Mark perhaps even predating canonical Mark Some claim it is a medieval or premodern forgery created by a monastic scribe And others argue it is a forgery created by Morton Smith himself All these positions are addressed in the papers contained in this volume Nine North American scholars internationally recognized for their contributions to the study of Secret Mark met at York University in Toronto Canada in April 2011 to examine recent developments in scholarship on the gospel and the letter in which it is found Their results represent a substantial step forward in determining the origins of this mysterious and controversial text List of Contributors Scott G Brown Tony Burke Stephen C Carlson Bruce Chilton Craig A Evans Paul Foster Charles W Hedrick Peter Jeffery Allan J Pantuck Marvin Meyer Hershel Shanks Pierluigi Piovanelli
