

# How to Email Your Professor

Missed a class? Need an extension on a paper? Want to set up an appointment during office hours? You'll probably have to send an email. That email is going to make an impression on your professor— for better or for worse. These simple guidelines from the Department of Humanities and Communication and the Writing Center can help you make sure it's for the better.

## Frequency

If you need to email any single professor more than twice in a single day, you should instead seek them out in person. Email is best suited to short questions, not long discussions.

## Email Account

Be careful of using non-university email accounts to email professors. There is no problem with using a Hotmail or Gmail account, but please make sure your real name shows up in the From line of the email. It is easier to place "David Seltzer" than "MacDaddy15."

## Subject Line

Email Subject lines should at the very least include the course title or name. Sending an email simply titled "question" may get it automatically routed into the junk mail folder without your professor even seeing it. Instead, try using "Comp 1 or ENG 100-215 question about paper."

## Greeting

Don't simply launch into your email with no greeting. Instead, address your professor in a friendly, professional manner at the start of your email. "Hi/Mr/Ms/Mx Professor/Dr. Smith," will work just fine.

## Politeness

Think of your professors as real people and an email as a real conversation. If you need something from a professor, please ask politely. "Would you please send me the assignment at your earliest convenience?" is much more likely to get a response than, "I need that assignment now."

## Complaints

If you're upset about a grade or something else in the class, don't just email. No matter how hard you try to be polite, your email may come off as angry or rude, and hurt your chances of getting a fair hearing. If you've got a complaint, send a polite email asking for an in-person appointment.

provides important advice to scientists at all stages of their careers on how to be a more effective and impactful researcher. It provides tips on designing, performing and analyzing experiments, writing, submitting and revising manuscripts, preparing and giving scientific talks and posters, writing grant proposals and writing and defending a graduate thesis. It also provides advice on soft skills like communication, networking, creativity, critical thinking and working in teams. A major emphasis of the book is the importance of writing and publishing scientific manuscripts as this is the main way that scientific knowledge is disseminated as well as being an important element for building a strong curriculum vitae. The book should be an extremely valuable resource for graduate students throughout their studies but should also be useful for postdocs and professors who want to hone their research skills. The book is written by three scientists from the same family who are each at different stages in their careers and can therefore provide different perspectives. David Julian McClements is a distinguished professor who is currently the most highly cited author in Food Science in the world. He has published over 1300 scientific articles and numerous books. Jake McClements is beginning his career as a lecturer in the United Kingdom while Isobelle Farrell McClements is just starting her career as a graduate student in the United States.
