How To Escape Magic Madness Beauty And Cynicism Excelsior Editions:

How to Escape Crispin Sartwell, 2014-08-13 Passionate and rollicking personal and intellectual essays by philosopher Crispin Sartwell. Philosopher, music critic, and syndicated columnist Crispin Sartwell has forged a distinctive and fiercely original identity over the years as a cultural commentator. In books about anarchism, art, and politics; Native American and African American thought and culture; Eastern spirituality and American transcendentalism, Sartwell has relentlessly insisted on an ethos rooted in unadorned honesty with oneself and a healthy skepticism of others. This volume of selected popular writings combines music and art criticism with personal memoir about addiction and rebellion, as well as cultural commentary on race, sexuality, cynicism, and the meaning of life. Crispin Sartwell deserves to be recognized as the heir to a distinctively American intellectual legacy. Like the American cynics he loves—Twain, Bierce, Menckens—he is fiercely individualistic, deeply antiauthoritarian, and slavishly aligned with no creed or academic discipline. He uses his significant erudition not to escape the ordinary or himself but rather to let loose riches of insight, suffering, and beauty through a relentless examination of life, culture, and reality. Sartwell is also, in my opinion, the best philosophical prose stylist of his generation. His writing is crystalline, vivid, and intoxicating, an uncontrollable substance. And though Sartwell swaggers, provokes, and sometimes infuriates, he does so with a tacit humility and self-scrutiny which empowers readers to follow his example and convert their own rage into beauty. Elizabeth Walden, Bryant University. Crispin Sartwell is the most important philosophical voice of his generation. He has risen into the public consciousness in the last two decades due to his controversial views on social, political, and cultural subjects. Through television appearances, journalism, and blogging, along with his numerous scholarly books, he has made a reputation as a thinker of serious thoughts. Yet there is a lightness to his world that is irreverent, fun, and entertaining. These essays reflect some of his best writing from the past fifteen years. They are highly readable, but they are also profound reflections on the subjects that will draw many of us into deeper ponderings about the meaning of life, or more to the point, the meaning of our lives. Randall Auxier, author of *Time Will and Purpose Living*. Ideas from the Philosophy of Josiah Royce. **How to Escape** Crispin Sartwell, 2014-08-13 Passionate and rollicking personal and intellectual essays by philosopher Crispin Sartwell. Turning Mental Health into Social Action Bernard Guerin, 2020-07-19 This book offers a refreshing new approach to mental health by showing how mental health behaviours lived experiences and our interventions arise from our social worlds and not from our neurophysiology gone wrong It is part of a trilogy which offers a new way of doing psychology focusing on people s social and societal environments as determining their behaviour rather than internal and individualistic attributions Mental health behaviours are carefully analysed as ordinary behaviours which have become exaggerated and chronic because of the bad life situations people are forced to endure especially as children This shifts mental health treatments away from the dominance of psychology and psychiatry to show that social action is needed because many of these bad life situations are produced by our modern society itself By providing new ways for readers to rethink everything they thought they knew about mental health issues and how to change them Bernard Guerin also explores how by changing our environmental contexts our local societal and discursive worlds we can improve mental health interventions This book reframes mental health into a much wider social context to show how societal structures restrict our opportunities and pathways to produce bad life situations and how we can also learn from those who manage to deal with the very same bad life situations through crime bullying exploitation and dropping out of mainstream society rather than through the mental health behaviours By merging psychology and psychiatry into the social sciences Guerin seeks to better understand how humans operate in their social cultural economic patriarchal discursive and societal worlds rather than being isolated inside their heads with a faulty brain and this will provide fascinating reading for academics and students in psychology and the social sciences and for counsellors and therapists

Reimagining Therapy through Social Contextual Analyses Bernard Guerin, 2022-07-29 This book attempts to shake up the current complacency around therapy and mental health behaviours by putting therapy fully into context using Social Contextual Analysis showing

how changes to our social discursive and societal environments rather than changes to an individual's mind will reduce suffering from the mental health behaviours Guerin challenges many assumptions about both current therapy and psychology and offers alternative approaches synthesized from sociology social anthropology sociolinguistics and elsewhere The book provides a way of addressing the mental health behaviours including actions talking thinking and emotions by taking people's external life situations into account and not relying on an imagined internal source Guerin describes the broad contexts for current Western therapies referring to social discursive cultural societal and economic contexts and suggests that we need to research the components of therapies and stop treating therapies as units He reframes different types of therapy away from their abstract jargons offering an alternative approach grounded in our real social worlds aligning with new thinking that challenges the traditional methods of therapy and also providing a better framework for rethinking psychology itself The book ultimately suggests more emphasis should be put on mental health behaviours as arising from social issues including the modern contexts of extreme capitalism excessive bureaucracy weakened discursive communities and changing forms of social relationships Practical guidelines are provided for building the reimagined therapies into clinics and institutions where labelling and pathologizing the mental health behaviours will no longer be needed By putting mental health behaviours and therapy into a naturalistic or ecological social sciences framework this book will be practical and fascinating reading for professional therapists counsellors social workers and mental health nurses as well as academics interested in psychology and the social sciences more generally
