How To Fix A Philips Tv:

Let's Fix It! Richard J. Schonberger, 2001-12-06 No company is built to last argues world renowned manufacturing guru Richard J Schonberger In this devastating indictment of current manufacturing practices Schonberger submits a four part revolutionary plan to solve the manufacturing crisis for good From his statistically reliable database of 500 top global manufacturers Schonberger finds that by the critical worldwide standard of lean production shedding inventories General Motors General Electric Toyota and other world leaders have stopped improving He presents powerful evidence that in recent years record profits have covered up waste and weakness Clearly a lack of will to renew and recover from the natural tendency toward regression and erosion it is more than a matter of garden variety complacency devastating as that is in this new era of global hypercompetition Schonberger asserts that the inclination of industry leaders to engage in stock hyping to gain a quick fix from the dot com explosion has distracted attention from the basics of world class excellence Among other villains contributing to the crisis Schonberger contends are newly hired managers with no trial by fire experience bad equipment systems and job design and retention of unprofitable customers and anachronistic command and control managerial hierarchies What to do Just as he introduced the legendary just in time framework to the West in the 1980s Schonberger prescribes strong medicine to cure our current malaise Find your blind spots he says Roll confusing time sapping initiatives into a master program that is immune from the flavor of the month Put lean into heavy handed control systems Develop products and standardize processes at home base for ease of migrating volume production anywhere in the world
