Consumer Tribes Avi Shankar,Bernard Cova,Robert Kozinets,2012-06-25 Marketing and consumer research has traditionally conceptualized consumers as individuals who exercise choice in the marketplace as individuals not as a class or a group However an important new perspective is now emerging that rejects the individualistic view and focuses on the reality that human life is essentially social and that who we are is an inherently social phenomenon It is the tribus the many little groups we belong to that are fundamental to our experience of life Tribal Marketing shows that it is not individual consumption of products that defines our lives but rather that this activity actually facilitates meaningful social relationships The social links social relationships

are more important than the things brands etc The aim of this book is therefore to offer a systematic overview of the area that has been defined as cultures of consumption consumption microcultures brand cultures brand tribes and brand communities It is though these that students of marketing and marketing practitioners can begin to genuinely understand the real drivers of consumer behaviour It will be essential to everyone who needs to understand the new paradigm in consumer research brand management and communications management Environmental Advertising in China and the USA Xinghua Li,2016-05-05 Since the late 1980s green consumerism has been hailed in the West as an efficient solution to environmental problems However Chinese consumers have been slow to warm up to eco friendly products Consumers prefer SUVs to hybrid cars health supplements and snake oil medicines to organic foods and eco fashion is still secluded in high end designer studios These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese This book examines the psycho cultural differences that disrupt the translation of eco friendly appeals to China by analyzing environmental advertising It explores the different notions of green the structures of desire that underlies the advertisements and how they are shaped by ideological cultural and historical differences Rather than arguing the superiority of the American or Chinese version of green consumerism the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies green advertising and marketing environmental communication and media studies China studies and environmental sociology ethics and cultural studies
