Applying the Rasch Model and Structural Equation Modeling to Higher Education A.Y.M. Atiquil Islam, 2023-06-16 This book introduces the fundamentals of the technology satisfaction model TSM supporting readers in applying the Rasch model and structural equation modeling SEM a multivariate technique to higher education HE research User satisfaction is traditionally measured along a single dimension However the TSM includes digital technologies for teaching learning and research across three dimensions computer efficacy perceived ease of use and perceived usefulness Establishing relationships among these factors is a challenge Although commonly used in psychology to trace relationships Rasch and SEM approaches are rarely used in educational technology or library and information science This book therefore shows that combining these two analytical tools offers researchers better options for measurement and generalisation in HE research This title presents theoretical and methodological insights of use to researchers in HE

Unpacking Technological

Pedagogical Content Knowledge for Classroom Practice Colin Lu, Wenli Chen, 2025-08-10 This book immerses readers in an illuminating exploration of Technological Pedagogical Content Knowledge (TPACK) within the context of professional development for educators. Based on a systematic examination of classroom realities, this research-intensive book delves into the intricate interplay between teachers' perceived TPACK proficiency, their lesson design, and the actual enactment of these lessons. It emphasizes the role of TPACK in empowering teachers to integrate Information and Communication Technology (ICT) effectively into their pedagogical practices, thereby enhancing 21st Century Competencies (21CC) in students. This book seeks to unravel the alignment or potential misalignment between educators' self-assessed TPACK levels and the practical application of TPACK principles in the classroom. It provides nuanced insights into the strategies employed by teachers, drawing from authentic classroom experiences. These insights serve as a bridge between TPACK theory and its effective integration into instructional practices. Engaging and thought-provoking, the various chapters invite readers on an academic journey that unearths practical insights and actionable strategies for enriching the educational experience in the digital era. This book represents a vital resource for educators, researchers, and policymakers dedicated to advancing technology integration in educational settings. It also extends its benefits to educators who have engaged in TPACK design, scaffold professional development, and those keen on navigating the dynamic landscape of pedagogy, content, and technology.
