

# How to Write SMART IEP Goals

## Specific

The goal is specific in naming the skill or subject area and the targeted result. It should include conditions and any accommodations that may need to be provided.

## Measurable

The goal is stated in a way that the student's progress can be measured. This can be done using standardized tests, curriculum-based assessments, or teacher observation. A clear criterion for success should be established.

## Achievable

The goal represents progress that is realistic for the student. Although goals can be ambitious, they are not able to meet a student's needs if they are unattainable.

## Relevant and Results-oriented

The goal clearly lays out what the student will do to accomplish it. It should be created based on a student's individualized need and it should contain clearly identified actions that the student will take to achieve the goal.

## Time bound

The goal includes a time frame in which the student will achieve it. It also should state when and how often progress will be measured.

## Example:

By October 2017, when given a set of manipulatives, ten frames, and a verbal prompt, Student will represent addition and subtraction within 20 with objects, drawings, and/or equations as measured by 80% accuracy on a teacher-created problem set during 4 out of 5 trials. Progress will be measured on a quarterly basis.
